RESOLUTION I CSP22.R1 EN

REPORT ON THE COLLECTION OF QUOTA CONTRIBUTIONS

THE XXII PAN AMERICAN SANITARY CONFERENCE,

Having seen the report of the Director on the collection of quota contributions (Document CSP22/16 and ADD. I) and taking into consideration the concerns expressed by the 97th Meeting of the Executive Committee with respect to Member Countries subject to Article 6.B who have not met their commitments for liquidation of their quota arrearages;

Noting the report of the Working Party on the application of Article 6.B of the PAHO Constitution relating to the suspension of voting privileges of Member Governments that fail to meet their financial obligations to the Organization in a timely manner (Document CSP22/16, ADD. II);

Recognizing that, in the case of the three Member Governments subject to Article 6.B, the Government of Haiti has continued to make payments towards its prior years' assessments, but that it has been unable to fully meet all of its payment commitments, and that the Government of Paraguay has presented a revised deferred payment plan which is acceptable to the Secretariat and the Article 6.B Working Party, as well as having made payments under its original payment plan; and

Noting specifically that the Article 6.B Working Party was in consensus that Article 6.B should be applied to the Dominican Republic, but also noting the Working Party's determination that the provisions of Article 6.A of the Constitution and the absence of an officially accredited Delegation from the Dominican Republic constitutionally precluded the application of Article 6.B at this time,

RESOLVES:

1. To take note of the report of the Director on the collection of quota contributions (Document CSP22/16 and ADD. I).
2. To express appreciation to Member Governments that have already made payments in 1986, and to urge all Member Governments in arrears to fulfill their financial obligations to the Organization in a prompt manner.
3. To permit the Government of Haiti to vote at this Pan American Sanitary Conference, in view of its efforts to comply with its payment commitments.
4. To permit the Government of Paraguay to vote at this Pan American Conference, and to endorse the acceptance of the Government's revised deferred payment plan.

5. To instruct the Article 6.B Working Party to reconvene and provide its recommendation to the Conference in the event that an accredited Delegation from the Dominican Republic is present at this Conference.

6. To request the Director:

- a) To continue to monitor the implementation of special payment agreements made by Member Governments in arrears for the payment of prior years' quota assessments, with particular attention to the case of the Dominican Republic;
- b) To advise the Executive Committee of Member Countries' compliance with their quota payment commitments;
- c) To report to the XXXII Meeting of the Directing Council on the status of the collection of quota contributions for 1987 and prior years.

(Approved at the second plenary session,
22 September 1986)

ANNUAL REPORT, 1985, AND QUADRENNIAL REPORT, 1982-1985,
OF THE DIRECTOR OF THE PAN AMERICAN SANITARY BUREAU

THE XXII PAN AMERICAN SANITARY CONFERENCE,

Having seen the Annual Report, 1985, and Quadrennial Report, 1982-1985, of the Director of the Pan American Sanitary Bureau (Official Document 207) on the work of PAHO during the interval between the XXI and XXII Pan American Sanitary Conferences;

Considering that the crisis of the countries in Latin America and the Caribbean profoundly affects the health status of their peoples, and the solutions proposed hitherto have been primarily economic in nature, and have given insufficient attention to the social sector;

Recognizing that the countries face a considerable challenge in the need to upgrade their public administration systems, especially those in the health sector, so that they will function more effectively by using available resources more efficiently;

Aware that the crisis of the international cooperation agencies is rooted in policy changes in the approach to external cooperation on the part of the leading contributing and donor countries, and in deficiencies of the internal management of the international agencies and in how their cooperation is provided to Member Countries;

Considering that in the last four years the Secretariat has made important efforts to cope with the aforementioned problems under the guidance of the working principles laid down in its Regional Budget Policy and in the Managerial Strategy for the Optimal Use of PAHO/WHO Resources in Direct Support to the Member Countries; and

Recognizing that these efforts have been expressed in subregional initiatives on health priorities, in an increase of contacts among countries and institutions, in more effective and substantive mobilization of internal and external resources, and in adjustments within the Secretariat to enhance its efficiency,

RESOLVES:

1. To urge the Member Countries to redouble their efforts to define national policies and priorities for the serious problems of coverage in the health field, inefficient use of resources, and the inequity and high cost of medical care systems, so that the Organization may direct its resources toward measures of highest impact in the advancement of health toward the goal of health for all.

2. To thank the Director of the PASB for the important report on activities in the quadrennium 1982-1985, which attests to the great magnitude of the effort made by the Secretariat to overhaul the operations of PAHO and adjust them to the present situation, while seeking new forms of technical cooperation.

3. To recommend to the Director that he continue his efforts at the highest national and international policy levels to bring about real recognition of the importance of social development as an essential component of economic growth, and therefore of the need to integrate the social sector, and especially health, into overall development plans.

4. To recommend to the Director that the work be continued for development of the Secretariat as a necessary condition for increasing the efficient use of its resources, highlighting as fundamental purposes the strengthening of the planning, programming, monitoring and evaluation system; the deepening of relations with the governments and of their participation in the affairs of the Organization; the improvement of its administrative systems; and modernization of the policies and systems for use of the Organization's own manpower.

5. To request the Director to continue improving the structure and content of his Report so that it may become a fundamental element in evaluating the operations of the Bureau and the Organization.

(Approved at the seventh plenary session,
25 September 1986)

(Approved at the seventh plenary session,

CARIBBEAN COOPERATION IN HEALTH

THE XXII PAN AMERICAN SANITARY CONFERENCE,

Having been informed of the initiative for health in the Caribbean known as "Caribbean Cooperation in Health," developed by PAHO and the Caribbean Community (CARICOM) at the request of the Ninth Meeting of the Conference of Ministers Responsible for Health in the Caribbean, held at Roseau, Dominica, 1984;

Considering that the Caribbean Ministers of Health attending the XXXI Meeting of the Directing Council of PAHO in Washington, D.C., September 1985, gave unanimous support to the plan presented by PAHO and CARICOM, and agreed to actively promote and develop the initiative within their countries;

Noting that the Caribbean Ministers at the Meeting of the Tenth Conference of Ministers Responsible for Health in the Caribbean (CMH) held at Georgetown, Guyana, in 1986, formally endorsed the initiative and its objectives, priorities, and approaches;

Appreciating that the English-speaking Caribbean countries share a common history, have had a long tradition of cooperation in matters of culture, education, health and economic development, noteworthy examples of which are subregional institutions such as the CARICOM itself, the University of the West Indies, and the Caribbean Development Bank;

Aware that this initiative is an application of the subregional approach utilized by PAHO in its delivery of technical cooperation in the Caribbean, as exemplified by the Caribbean Program Coordinator's Office, the Caribbean Food and Nutrition Institute, and the Caribbean Epidemiological Center;

Accepting that the six priority areas identified and agreed on for the development of the initiative are those reflected in the subregional policy statements, strategies, and plans of action previously endorsed by the CMH; and

Convinced that the successful execution of Caribbean Cooperation in Health will be an important contribution to the attainment of health for the peoples of the Caribbean subregion and to the global goal of Health for All by the Year 2000,

INTERNATIONAL DRINKING WATER SUPPLY AND SANITATION DECADE
REGIONAL PROGRESS

THE XXII PAN AMERICAN SANITARY CONFERENCE,

Having seen the document presented by the Director on the International Drinking Water Supply and Sanitation Decade (1981-1990)--Regional Progress;

Recalling Resolution XXII of the XXVI Meeting of the Directing Council of PAHO (1979) and Resolutions WHA36.13 (1983) and WHA39.20 (1986) on the Decade, in which it is recognized that drinking water supplies and sanitation are essential to the success of the strategy of Health for All by the Year 2000 and that the Decade assigns priority to marginal urban and low-income rural populations;

Noting the efforts made by the Governments, the degree of external support, and the progress made by the Decade program to date;

Noting further the need to change the trends of coverage seen in the first half of the Decade, which indicate that several countries in the Region will be unable to reach the goals they have set for themselves, and that special efforts will be required if more progress is to be made in the final five years; and

Taking into account the recommendations in the report of the Director in regard to the participation of health authorities in drinking water supply and sanitation programs through intersectoral collaboration, and for effective cooperation with external cooperation agencies,

RESOLVES:

1. To urge the Member Countries:
 - a) To make a greater political commitment to attainment of the goals of the Decade, including incorporation of their national water supply and sanitation plans in their national economic and social development plans;
 - b) To improve water quality, including fluoridation, and to extend the coverage of sewer and excreta disposal services to levels comparable to those of water supply services;
 - c) To promote and support the provision of drinking water and sanitation as essential components of primary health care;

- d) To ensure intersectoral collaboration and coordination among national entities, international organizations and bilateral agencies and other participants in the Decade in order to optimize efforts;
 - e) To foster the administrative and technical development of the institutions responsible for water supply and sanitation services, including their human resources, so that they may carry out the functions of planning, execution and, in particular, operation, maintenance and rehabilitation of the services;
 - f) To promote the control of losses and the efficient use of water in integration with institutional development so as to optimize the use of installed capacity and extend the drinking water supply systems to serve the largest possible proportion of the population;
 - g) To ensure the participation of the community, and especially of women, in all stages--the planning, building, management, operation and maintenance--of the development of these services;
 - h) To identify and mobilize on a large scale the national and local financial, human, technical and administrative resources by means of innovative strategies so as to reduce costs.
2. To urge the international cooperation and financing agencies:
- a) To continue giving high priority to drinking water supplies and sanitation, and to increase the proportion of the funds they allocate for the financing of services, especially for the urban and rural poor;
 - b) To increase the proportion of the funds they allocate to institutional and manpower development, to operation, maintenance and rehabilitation, to public information, to sanitary education, and to community participation;
 - c) To continue their efforts to improve coordination and exchanges of information at the country and regional level with national establishments and other interested external agencies.
3. To request the Director:
- a) To continue supporting the countries in the development of their programs on the Decade, with special emphasis on intersectoral coordination and action with other external agencies;

- b) To continue supporting the promotion of research in the health aspects of drinking water supply and sanitation programs and in the use of these services as well as in the development of low-cost technology;
- c) To continue supporting the development of drinking water supply and sanitation institutions, including their human resources, and in particular to promote and support efforts to make more efficient use of the installed capacity of drinking water supply systems;
- d) To continue supporting the development of Decade programs in the countries with a subregional approach that reinforces the national effort;
- e) To publicize the experiences of the countries in community participation, the mobilization of resources, appropriate technology, operation and maintenance, and other important aspects, and to encourage exchanges of information;

PAHO PLAN OF ACTION FOR FOOD SAFETY.

THE XXII PAN AMERICAN SANITARY CONFERENCE,

Having seen the report of the Director on the Program of Food Protection and the report of the 97th Meeting of the Executive Committee;

Noting that this Program and its associated Plan of Action were designed and developed in compliance with Resolution XVI of the XXXI Meeting of the Directing Council of PAHO, held in 1985; and

Aware that well designed and executed food protection programs are imperative in the countries of the Region for the provision of foods that are safe and of good quality, thereby protecting the health of their populations, avoiding considerable food losses, and mitigating the severe economic consequences of the rejection of foods that are exported, all of which work greatly against the economic development and well-being of the countries,

RESOLVES:

1. To urge the Member Countries:
 - a) To give higher priority to the establishment or strengthening of national food protection programs;
 - b) To increase the intersectoral coordination of national food protection activities;
 - c) To increase the resources allocated to the development of national food protection programs;
 - d) To increase cooperation with other countries in the Region in aspects in which they are most advanced;
 - e) To support the efforts that PAHO may undertake with international financing agencies, multilateral and bilateral cooperation agencies, and industrial firms, for the purpose of augmenting the resources available for technical cooperation in food protection activities with the countries in the Region;
 - f) To strengthen the efforts targeted to establishing necessary laws and regulations to ensure adequate implementation of national food protection programs.

2. To request the Director:
 - a) To continue supporting food protection and safety activities;
 - b) To continue coordination with and seek financial support from the international financing agencies and the multilateral and bilateral agencies, and with the private sector, for increased technical cooperation with the countries in food protection.

Considering Decision 8 of the 77th Session of the Executive Board of WHO, which requests the Regional Committees of WHO to examine Section 5 of the Working Principles Governing Relations with Nongovernmental Organizations, which bears on regional and national nongovernmental organizations;

Considering that Resolution XX of the XX Pan American Sanitary Conference, "Mechanisms for the Establishment of Official Relations between PAHO and Inter-American Nongovernmental Organizations," is compatible with Section 5 of the Working Principles for Nongovernmental Organizations in official relations with WHO; and

HIRING UNDER LOCAL CONDITIONS OF EMPLOYMENT FOR
THE MOBILIZATION OF NATIONAL RESOURCES

THE XXII PAN AMERICAN SANITARY CONFERENCE,

Having reviewed the Director's report (Document CE97/23, Rev. 1) on the local hiring of personnel;

Considering that the Organization possesses, in its own right, the legal capacity needed to issue its own legally binding rules on the appointment, qualifications, rights and obligations of its employees, and further possesses within the territory of each of its Member Countries the juridical personality endowing it with the capacity to take legal actions and enter into agreements, of any nature; and

Mindful that these two capacities make it legally possible and fitting to establish two categories of personnel in the Organization, the first comprised of international staff members, whether internationally or locally recruited, who will continue to be governed, as hitherto, by the Staff Regulations and Staff Rules of PAHO, and the second, created by means of this resolution, consisting of national staff members appointed to such posts as the Director shall determine, who shall be governed in all their relations with the Organization by the labor laws and practices of the country in which they serve. This new category of personnel shall replace that of the present contractors and consultants in cases in which there actually exists an employer/employee relationship, and personnel in this category shall be referred to as national staff members because their conditions of employment shall be governed, in fact and in law, by the labor legislation and practices of the countries in which they serve,

RESOLVES:

1. That effective immediately until 30 September 1989 (unless a differing recommendation be made by the Executive Committee, in the interim), the Staff Regulations shall be amended as follows:

"1.12 The Bureau may hire under local conditions of employment national staff members (nationals of the country and aliens, whether residents or not, who legally qualify for employment there), to whom the Staff Regulations and Rules shall not apply save in regard to the present Article I on Duties, Obligations and Privileges as national employees and not as international functionaries. Respecting privileges, such employees shall be governed by the Basic Agreement on Privileges and Immunities between the Organization and the country in which they are employed.

- 1.13 The contracts of such national employees shall be governed in every aspect, including those of work-related accidents, social security and pensions, by the labor laws and practices of the country concerned.
 - 1.14 The Director shall determine the posts to be subject to these rules and shall establish scales of salaries and allowances, in conformity with competitive conditions of employment of the locality in the type of work performed or related to the functions of the office.
 - 1.15 National employees shall have access to arbitration or labor tribunals of the countries in which they are employed for the settlement of disputes, in accordance with their respective contracts, and shall therefore have no access to the Administrative Tribunal of the International Labor Organization, whose competence is not recognized in respect of national employees."
2. To request the Director to issue such rules as he may deem appropriate to regulate contracts of this type for national personnel, subject to confirmation by the Executive Committee pursuant to Staff Rule 015.2, and to incorporate them into the Staff Rules.
 3. To request the Director to provide the Executive Committee with annual interim reports on the implementation of these amendments to the Staff Regulations, and with a full report, prior to 31 May 1989, to include such matters as identification of the positions involved, the cost implications, administrative adjustments, and general operations of the system of hiring under local conditions of employment, together with his recommendations regarding this new system.
 4. To request the Director, pending completion of the review by the Executive Committee in 1989; to implement these amendments on a limited basis and to exclude from the application thereof any currently established posts under the Staff Rules and Regulations which are not or do not become vacant unless the Executive Committee decides otherwise in advance.
 5. To delegate to the Executive Committee the authority to determine if these amendments to the Staff Regulations shall remain in effect after 30 September 1989.
