TENTATIVE BUDGETARY PROJECTIONS FOR THE PROGRAM BUDGET OF THE WORLD HEALTH ORGANIZATION FOR THE REGION OF THE AMERICAS FOR THE BIENNIUM 1982-1983

The Executive Committee at its 84th Meeting reviewed the tentative budgetary projections for the program budget of the World Health Organization for the Region of the Americas for the biennium 1982-1983 appearing in Official Document 161 and adjusted in Document CE84/5 and ADD. I (Annexes I and II). It adopted the following Resolution XIV:

THE EXECUTIVE COMMITTEE,

Having considered in detail at its 82nd Meeting Official Document 161 submitted by the Director of the Pan American Sanitary Bureau, which contains the provisional draft of the program budget of the World Health Organization for the Region of the Americas for 1982-1983 amounting to \$45,071,900;

Having considered Document CE84/5 and ADD. I, which contains adjustments to that program budget amounting to \$1,059,900 in order to reduce the budget to the allocation of \$44,012,000 from the World Health Organization for the Region of the Americas for the biennium 1982-1983; and

Bearing in mind that the provisional draft of the program budget, together with the adjustments, is to be submitted to the XXVII Meeting of the Directing Council, XXXII Meeting of the Regional Committee of the World Health Organization for the Americas, for review and transmittal to the Director-General of the World Health Organization,

RESOLVES:

To recommend to the XXVII Meeting of the Directing Council, XXXII Meeting of the Regional Committee of the World Health Organization for the Americas, that it approve a resolution along the following lines:

THE DIRECTING COUNCIL,

Having considered Official Document 161 submitted by the Director of the Pan American Sanitary Bureau, which contains the provisional draft of the program budget of the World Health Organization for the Region of the Americas for 1982-1983, amounting to \$45,071,900;

Having considered the proposed adjustments to that program budget, contained in Document CE84/5 and ADD. I of the 84th Meeting of the Executive Committee, amounting to \$1,059,900 in order to reduce the budget to the allocation of \$44,012,000 from the World Health Organization for the Region of the Americas for the biennium 1982-1983;

Bearing in mind that the provisional draft of the program budget, as adjusted, is submitted to the Directing Council as Regional Committee of the World Health Organization for the Americas for review and transmittal to the Director-General of the World Health Organization; and

Noting the recommendations made by the 84th Meeting of the Executive Committee,

RESOLVES:

To approve the provisional draft of the program budget of the World Health Organization for the Region of the Americas for 1982-1983 appearing in Official Document 161 and adjusted in Document CE84/5 and ADD. I of the 84th Meeting of the Executive Committee, and to request the Regional Director to transmit it to the Director-General.

TENTATIVE BUDGETARY PROVISIONS FOR THE PROGRAM BUDGET OF THE WORLD HEALTH ORGANIZATION FOR THE REGION OF THE AMERICAS FOR THE BIENNIUM 1982-1983

Background

When the Proposed Program and Budget Estimates (Official Document 161) were prepared early in 1979 for presentation to the 82nd Meeting of the Executive Committee and the XXVI Meeting of the Directing Council, tentative allocation levels for WHO Regular funds for the biennium 1982-1983 had not been issued by the World Health Organization, since the World Health Assembly did not approve these levels until its May 1979 meeting. Thus, the amount included in OD-161, \$45,071,900, was based on the best estimate the staff could make at the time the document was prepared.

In June 1979 the World Health Organization allocated an amount of \$44,012,000 in WHO Regular funds to the Region of the Americas for the 1982-1983 biennium. This necessitates a downward adjustment of \$1,059,900 in the program proposed for that biennium in OD-161.

Adjustments

The Director proposes that the needed adjustments be made in Headquarters regional projects. Some of the decreases are due to continued support by the United Nations Fund for Population Activities (UNFPA) of several posts which had been proposed for transfer to regular funding in 1982-1983. Other adjustments result from changes in the organizational structure of Headquarters staff, in which some posts have been deleted and others added in order to improve operations and management.

Since some of the posts deleted or transferred to extrabudgetary funding were originally proposed to be supported by PAHO Regular funds, several budget items have been moved from WHO Regular funding, in order to maintain PAHO Regular at the level of \$87,816,700 shown in OD-161, and to reduce WHO Regular to the allocation of \$44,012,000, as discussed above.

Details of the proposed adjustments in the funding for 1982-1983 are shown in Table 1; the 1982-1983 budget is presented in the WHO classification form in Table 2; and revised budget tables, with appropriate OD-161 page references, are included in the Annex.

Provisional Agenda Item 18

CE84/5, ADD. I (Eng.)
19 June 1980
ORIGINAL: ENGLISH

TENTATIVE BUDGETARY PROJECTIONS FOR THE PROGRAM BUDGET OF THE WORLD HEALTH ORGANIZATION FOR THE REGION OF THE AMERICAS FOR THE BIENNIUM 1982-1983

ADDENDUM

The Annex to this document as it was originally prepared presents revised budget tables, with appropriate OD-161 page references, to reflect the changes included in Table 1 of the document. In an effort to make direct comparisons with OD-161 as it was printed, these tables did not include the supplementary appropriation of \$1,041,400 for the animal health centers, which was approved by the XXVI Meeting of the Directing Council of PAHO.

In order to provide a complete picture of the 1980-1981 budget as finally appropriated, the tables attached as an annex to this Addendum do include the supplementary appropriation for the animal health centers.

Annex

Special attention is given to health education and communication. Information on vesicular diseases is distributed by means of weekly and monthly epidemiological bulletins and a quarterly trilingual journal.

The research, diagnosis and reference activities of the Center are primarily studies on new vaccines that can reduce the number of annual revaccinations that must be performed under the program; methods of determining the effectiveness of vaccines; methods for the diagnosis of vesicular diseases; animals that are virus carriers; epidemiological nature of the disease; new sources of antigen; immunity levels of animal populations; material and economic losses caused by foot-and-mouth disease, and determination of the cost/benefit ratio of a foot-and-mouth disease control program.

Every two years, the Scientific Advisory Committee examines the program of the Center and recommends future lines of action to the Director of PASB.

Because of the highly contagious nature of foot-and-mouth disease and the heavy movement of animals in the Hemisphere, control of the disease must be undertaken on a hemispheric scale, and all the countries affected must participate directly. All the countries that are free of the disease are carrying out activities or programs to prevent its introduction and have established a joint plan to eliminate any outbreak that may occur.

Furthermore, the strategy of the campaigns in most of the countries must be reoriented, and activities throughout the Hemisphere strengthened. The Center has participated in this endeavor and has helped to bring about unity and coordination at the hemispheric level.

In addition to contributing its own quota like the other countries, Brazil makes a special contribution for the purchase of materials and other articles necessary for maintenance of buildings, facilities and grounds, and pays the wages of the pertinent personnel.

Among the objectives of PANAFTOSA are those of preventing the introduction or the persistence of foot-and-mouth disease in the areas of the Americas that are free of it; the control of the disease and its eradication in infested areas; the promotion, through technical cooperation and coordination of national preventive programs, of the control of foot-and-mouth disease and its eradication; and the provision of advisory services on national animal health service infrastructure that will ensure the effective execution of foot-and-mouth disease campaigns.

AMRO-3300, PAN AMERICAN ZOOSES CENTER

In accordance with the responsibilities assigned to it and the recommendations made by the countries at the meetings of the Ministers of Health and of Agriculture of the Americas, the purpose of CEPANZO is to provide the American countries with technical cooperation in controlling zoonoses. It cooperates in the planning, execution and evaluation of programs and in personnel training. It provides diagnostic reference services and tests biological products, gives advice on laboratories, undertakes research, and provides information services.

Special emphasis is given to the conduct of programs for the prevention and control or eradication of brucellosis, tuberculosis, rabies, hydatidosis and leptospirosis; in addition, activities connected with programs for the protection and hygiene of foodstuffs are being stepped up, as are those for improving the diagnosis of zoonotic parasitic diseases of importance to human health such as cysticercosis, trichinosis and onchocerciasis. In 1979 it is planned to undertake activities on other zoonotic diseases including several viral diseases that are widespread in the Hemisphere.

The training of the human resources of the countries is one of the principal activities of the Center and is considered to be an ongoing activity since there is an increasing demand for trained personnel to carry out additional control programs. Training covers planning and administration of programs, diagnosis, production and testing of biological products, as well as applied research that is carried out in the laboratory or in the field. Training is made available to official health and agricultural agencies, as well as to the faculties of universities; it is also provided to other public agencies (national, provincial and municipal) concerned with the prevention and control of zoonoses. To demonstrate and standardize the most advisable techniques or procedures, the Center promotes the establishment of pilot programs or of experimental areas in different countries.

The countries have assigned the Center the functions of a regional reference laboratory for brucellosis, rabies, leptospirosis, tuberculosis, hydatidosis, and microbiology of foodstuffs. CEPANZO reproduces, maintains, and distributes strains for the production of reference antigens and vaccines and receives pathological material or strains for reference diagnosis, as well as vaccines, sera and antigens for control tests.

The research projects of the Center are predominantly applied research projects, and their principal objectives are the improvement of methods of diagnosis and of producing and testing vaccines and antigens, as well as the acquisition of a better epidemiological knowledge of zoonoses and of the operating procedures that will make the execution of control programs more efficient.

The periodical publications of the Center are distributed to several hundred institutions and thousands of professional personnel throughout the Americas. These publications endeavor to overcome the critical shortage of information available to professionals working at the rural level who are remote from scientific libraries and information centers. Furthermore, professional personnel working at the central level in the countries are kept duly informed of the principal scientific and technological activities relating to the prevention and control of zoonoses.

Finally, the Center cooperates in the negotiation of intercountry agreements and conventions for the coordination of activities that will expedite border control of trade in animals and foodstuffs of animal origin, as well as of biological products. It also promotes exchange of epidemiological information, standardization of regulations, personnel training, and exchange of knowledge and experience of mutual interest.

AMRO-3370, RABIES CONTROL

Canine rabies is an important public health problem throughout the Hemisphere. Except in Canada and the United States, the principal carrier of the disease is the dog, which is also the principal transmitter. In Canada and the United States of America, wildlife rabies is a threat to man. The seriousness of the rabies problem becomes apparent when it is recognized that it is necessary to provide medical services to thousands of persons that have been bitten and to provide rabies treatment to all those that have been attacked by rabid animals or by stray dogs. In Latin America the seriousness of the human problem is compounded by the very high mortality in bovine cattle due to rabies transmitted by vampire bats which are present in all the tropical areas from Mexico to the Argentina Chaco.

When carried out regularly, national canine vaccination programs are reducing the number of cases of human rabies in several cities but, in certain countries, the incidence of rabies remains high because the coverage of the campaign is inadequate, and control activities are limited or interrupted.

The demand for rabies vaccine for human and animal use is rapidly increasing each year. Laboratories in Latin America are now unable to meet the demand, and the importation of expensive vaccine from the developed countries is not economically feasible. Production laboratories must be expanded and, for that purpose, equipment and supplies must be provided and laboratory personnel trained. National rabies control programs can be carried out at a faster rate if a sufficient supply of vaccine is available and instructions for their use are issued in Spanish.

The purpose of this project is to cooperate with national and municipal programs for the control of rabies through consultation and supply of vaccines and equipment.

AMRO-3500, FOOD PROTECTION

Toxic infections carried by food continue to be the principal cause of infant mortality in most of the Member Countries. Economic losses for food are staggering due to wastage from contamination by biological, chemical and physical agents. Safe food for this vulnerable age group of the population is the ultimate objective of this project. Emphasis is placed on strengthening the various components of the national food protection program and services. The proper handling of food in a sanitary manner while supported by adequate storage, refrigeration and transport will ensure wholesome food for these infants and their families.
