13rd DIRECTING COUNCIL

13rd SESSION OF THE REGIONAL COMMITTEE

Washington D.C., 3 - 13 October 1961

RESOLUTION

CD13.R25

STATUS OF MALARIA ERADICATION IN THE AMERICAS

THE 13rd DIRECTING COUNCIL,

Having examined the IX Report on the status of malaria eradication in the Americas (Document CD13/3);

Bearing in mind the previous resolutions of the Governing Bodies, in particular Resolution XLII of the XIV Pan American Sanitary Conference and Resolution WHA8.30 of the Eighth World Health Assembly;

Bearing in mind the success attained by certain countries in their eradication campaigns in extensive fertile areas, which are already being made productive and are contributing to social and economic development; and

Considering, however, that malaria continues to be a serious obstacle to progress in other regions of the Americas,

RESOLVES

1. To take note of the IX Report on the status of malaria eradication in the Americas (Document CD13/3).

2. To express its satisfaction with the success already achieved in some of the eradication programs.
3. To express its satisfaction also with the continuing interest shown by the Governments and by the Pan American Sanitary Bureau in solving the technical and administrative problems encountered in eradication work, and the hope that their efforts to overcome these problems will be intensified.
4. To convey once again its appreciation to the Governments that have generously contributed to the PAHO Special Malaria Fund, expressing the hope that they will continue their contributions and that other Governments will endeavor to contribute to the Fund.
5. To again convey its appreciation to the United Nations Children's Fund and to the International Cooperation Administration of the United States of America for the collaboration they are rendering to the countries, and to reiterate the hope that this collaboration will continue.
