

Global & Regional Update

3 PM WDC. 30 May 2020.

PAHO UPDATES

In the Region of the Americas, an additional 63,041 cases and 2,904 deaths were reported in the past 24 hours, representing a 2% relative increase for cases and deaths respectively, compared to the previous day.

- Countries reporting the highest numbers of **new cases** ($\geq 1,000$) compared with the previous day are: **Brazil** (26,928 additional cases, 6% increase), the **United States of America** (17,962 additional cases, 1% increase), **Peru** (6,506 additional cases, 5% increase), **Chile** (4,220 additional cases, 5% increase), **Mexico** (3,227 additional cases, 4% increase), and **Colombia** (1,322 additional cases, 5% increase).
- The **United States of America** accounts for 63% of all cases and 65% of all deaths, and **Brazil** accounts for 17% of all cases and 18% of all deaths, for the Region of the Americas. Combined, these two countries account for 80% of all cases and 82% of all deaths currently reported in the Region of the Americas.
- Countries reporting the highest numbers of **new deaths** (≥ 100) are the **United States of America** (1,073 additional deaths, 1% increase), **Brazil** (1,124 additional deaths, 4% increase), **Mexico** (371 additional deaths, 4% increase), and **Peru** (131 additional deaths, 3% increase).
- The **pooled crude case-fatality estimate** (the number of reported deaths divided by the reported cases) in the region of the Americas is **5.7%** (median country-specific estimate: 3.5%; IQR: 1.0% - 7.5%).

GLOBAL UPDATES FROM LAST 24 HOURS

From WHO's summary concerning COVID-19:

- 108,220 **new confirmed cases** from 150 countries/territories/areas. **Brazil, United States of America, Russian Federation, India, Peru, Chile, Mexico, France, Pakistan, and Bangladesh** are among the 10 countries reporting the **highest number of cases**.
- 4,363 **new deaths** from 86 countries/territories/areas. **Brazil, United States of America, Mexico, The United Kingdom, Russian Federation, Peru, India, Canada, Italy, and France** are among the 10 countries reporting the **highest number of deaths**.

NOTEWORTHY COVID-19 NEWS

United States of America – According to a Morbidity and Mortality Weekly Report (MMWR) published by the United States Centers for Disease Control and Prevention (CDC), four separate lines of evidence (syndromic surveillance, virus surveillance, phylogenetic analysis, and retrospectively identified cases) suggest that limited U.S. community transmission likely began in late January or early February 2020, after a single importation from China, followed by multiple importations from Europe. Until late February, COVID-19 incidence was too low to be detected by emergency department syndromic surveillance for COVID-19-like illness. [US CDC](#)

COVID-19 & Mental Health: The UN and WHO have urged governments to take the mental health consequences of the pandemic seriously and ensure widespread availability of mental health support. WHO discusses this in a recently released [article](#) and has published [guidelines](#) for communities and a [children's book](#).

Table notes on the next page

Table Notes

NOTES: Case and death counts may include both confirmed and probable classifications depending on the reporting Member State. Recovered counts as indicated and defined by reporting Member States.

To date, rapid diagnostic tests (RDTs) are not recommended for use by WHO.

United States of America: Case and death counts includes both confirmed and probable classifications, as published on the U.S. Centers for Disease Control and Prevention (US CDC) website on 29 May (for data confirmed at 16:00 EST the previous day). Excludes counts for Guam, Commonwealth of the Northern Marianas, Puerto Rico, and the United States Virgin Islands. Source: <https://bit.ly/2WJN2dd>. Recovered counts as reported by state and territorial health authorities, available at the COVID Tracking Project <https://bit.ly/2ztbRC6>

Chile: Confirmed cases include both symptomatic and asymptomatic PCR-positive cases, as defined by Chile MoH, available at: <https://bit.ly/2KQ99Jw>

Ecuador: Aggregated case total as reported by the Ecuador Ministry of Public Health (29,615 positive by RT-PCR + 8,956 by RDTs). To date, these RDTs are not recommended for use by WHO. The Ecuador Ministry of Public Health reports an additional 2,129 'probable deaths' under investigation that are not included in this table. Recovered counts are the sum of the recovered patients, hospital discharges, and epidemiological discharges as per the Ecuador Ministry of Public Health. Available at: <https://bit.ly/2RZtqjR>

Mexico: Recovered counts as reported by the Mexico MoH, as defined as all those positive for SARS-CoV-2 with a symptom onset date of more than 14 days, with no date of death, available at: <https://bit.ly/3blOdzo>

Peru: Aggregated case total as reported by the Peru MoH (37,650 by RT-PCR + 118,021 by RDTs). To date, these RDTs are not recommended for use by WHO.

Puerto Rico: Aggregated case total as reported by the Puerto Rico Department of Health (DoH); 1,300 were positive by RT-PCR and 2,418 were positive by serological tests. Total deaths include probable deaths. Available at: <https://bit.ly/2VvjksQ>
