

25 May 2020

**Global** 5,366,454  
cases

344,337  
deaths

215  
countries/territories/areas

### PAHO HIGHLIGHTS

In the Region of the Americas, an additional 59,156 cases and 2,267 deaths were reported in the past 24 hours, representing a 2% relative increase for cases and deaths respectively, compared to the previous day.

- Countries reporting the highest numbers of **new cases** ( $\geq 1,000$ ) compared with the previous day are: the **United States of America** (26,158 additional cases, 2% increase), **Brazil** (15,813 additional cases, 5% increase), **Chile** (4,895 additional cases, 7% increase), **Peru** (4,205 additional cases, 4% increase), **Mexico** (2,764 additional cases, 4% increase), and **Canada** (1,022 additional cases, 1% increase).
- The **United States of America** accounts for 66% of all cases and 67% of all deaths, and **Brazil** accounts for 15% of all cases and 16% of all deaths, for the Region of the Americas. Combined, these two countries account for 81% of **all cases** and 83% of **all deaths** currently reported in the Region of the Americas.
- Countries reporting the highest numbers of **new deaths** ( $\geq 100$ ) are the **United States of America** (1,046 additional deaths, 1% increase), **Brazil** (653 additional deaths, 3% increase), and **Mexico** (215 additional deaths, 3% increase).
- In the past seven days **Mexico** reported an average of 316 deaths per day with 479 deaths being reported on Saturday alone (23 May) – the highest daily toll since the beginning of the outbreak in the country. Similarly, **Brazil** reported an average of 935 deaths per day in the past 7 days with 1,179 deaths being reported on 20 May – the highest since the onset of the outbreak in the country. Since then, more than 1,000 deaths a day were also reported on 22 and 23 May in Brazil.
- A total of 20 countries/territories are **reporting community transmission**.
- The **pooled crude case-fatality estimate** (the number of reported deaths divided by the reported cases) in the region of the Americas is **5.9%** (median country-specific estimate: 3.9%; IQR: 1% - 7.6%).

### Global Updates from last 24 hours

From WHO's summary concerning COVID-19:

- 100,733 new confirmed cases from 140 countries/territories/areas
- 4,290 new deaths from 80 countries/territories/areas
- The 10 countries reporting the highest number of cases in past 24 hours: **United States of America, Brazil, Mexico** The United Kingdom, Russian Federation, India, Italy, Canada, **Peru**, and Sweden

WHO has partnered with Vital Strategies and other global partners to launch a new technical package: [Revealing the Toll of COVID-19: A Technical Package for Rapid Mortality Surveillance and Epidemic Response](#), meant to support national governments with surveillance and response planning surrounding COVID-19.

Table notes on the next page

## Table Notes

**NOTES:** Case and death counts may include both confirmed and probable classifications depending on the reporting Member State.

Recovered counts as indicated and defined by reporting Member States.

To date, rapid diagnostic tests (RDTs) are not recommended for use by WHO.

**United States of America:** Case and death counts includes both confirmed and probable classifications, as published on the U.S. Centers for Disease Control and Prevention (US CDC) website on 24 May (for data confirmed at 16:00 EST the previous day).

Excludes counts for Guam, Commonwealth of the Northern Marianas, Puerto Rico, and the United States Virgin Islands. Source: <https://bit.ly/2WJN2dd>. Recovered counts as reported by state and territorial health authorities, available at the COVID Tracking Project <https://bit.ly/2ztbRC6>

**Chile:** Confirmed cases include both symptomatic and asymptomatic PCR-positive cases, as defined by Chile MoH, available at: <https://bit.ly/2KQ99Jw>

**Ecuador:** Aggregated case total as reported by the Ecuador Ministry of Public Health (27800 positive by RT-PCR + 8956 by RDTs). To date, these RDTs are not recommended for use by WHO. The Ecuador Ministry of Public Health reports an additional 1986 'probable deaths' under investigation that are not included in this table. Recovered counts are the sum of the recovered patients, hospital discharges, and epidemiological discharges as per the Ecuador Ministry of Public Health. Available at: <https://bit.ly/2RZtqjR>

**Mexico:** Recovered counts as reported by the Mexico MoH, as defined as all those positive for SARS-CoV-2 with a symptom onset date of more than 14 days, with no date of death, available at: <https://bit.ly/3bIOdz0>

**Peru:** Aggregated case total as reported by the Peru MoH (31347 by RT-PCR + 84407 by RDTs). To date, these RDTs are not recommended for use by WHO.

**Bonaire, Sint Eustatius, and Saba:** Relative increase in cases a result of a recently confirmed case in Saba. Case is from April and patient has already recovered. Transmission type remains *no cases*.

**Puerto Rico:** Aggregated case total as reported by the Puerto Rico Department of Health (DoH); 1230 were positive by RT-PCR and 1959 were positive by serological tests. Total deaths include probable deaths. Available at: <https://bit.ly/2VvjksQ>
