

PAHO

Office for Barbados and the Eastern Caribbean Countries

COVID-19 Situation Update - 143

22 October 2021

This situation update is on the Novel Coronavirus (COVID-19) reported cases, deaths and related vaccination status, Globally, Regionally, for Barbados and the Eastern Caribbean Countries, French Territories, and the United Kingdom Overseas Territories.

Local hotspots drive new COVID-19 cases in the Americas, calling for increased surveillance

PAHO Director says spikes seen in several countries and surveillance critical to identify local outbreaks and prevent further spread of the disease.

Washington, D.C., October 20, 2021 (PAHO) -- While overall vaccination coverage has reached 41% in Latin America and the Caribbean, surveillance will remain key to identifying new risks and responding to local infection hotspots, the Director of the Pan American Health Organization (PAHO), Carissa F. Etienne said.

The PAHO Director warned of increased infection rates in the Caribbean, parts of Canada, Mexico, Bolivia, and Venezuela, and underscored the need to track and manage infections closely as vaccine rollout continues.

"Surveillance has always been the eyes and ears to guide our COVID response," Dr Etienne said during a press briefing, "as we navigated our pandemic peaks and as we continue to track emerging variants "

"Health authorities should have a clear picture of what is happening at the local level and quickly communicate both the risks and the public health measures needed to reduce transmission," she said.

For municipalities to detect risks as they emerge, the Director added, institutions such as laboratories, public health schools and univer

sities must also be empowered to diagnose new infections locally.

She also called for enhancing surveillance tools and networks to monitor diseases more efficiently and sustainably, adding that PAHO is working with the US Centers for Disease Control and Prevention (CDC) to implement a new PCR test protocol to simultaneously detect COVID-19 and influenza from the same sample.

COVID-19 highlights

ANGUILLA - Effective November 1, 2021, amendments will be made to the entry regime for all fully vaccinated arrivals - whether a visitor or returning resident. These include - visitors 18 years and older excluding pregnant wormen must be fully vaccinated; a negative Covid-19 test is required taken no less than 2-5 days prior to arrival; the laboratory processing pre-arrival test must be accredited, self administered home tests and antibody tests will not be accepted.

BARBADOS - The roll out of booster shots, began on Wednesday October 20, 202, starting with staff of the Queen Elizabeth Hospital. Under the National Vaccination Programme for COVID-19, on October 21, booster shots were offered to fully vaccinated persons aged 70 and over, and those who are immunocompromised and who had received their second dose before the end of April.

Effective Sunday, October 24, 2021 fully vaccinated travellers to Barbados with a valid negative pre-flight Covid-19 PCR test result will no longer be required to take a Covid-19 test or quarantine on arrival to the island.
