## PREFACE

The *International Statistical Classification of Diseases, Injuries and Causes of Death* has been developed to promote international uniformity in morbidity and mortality statistics.

The List of Categories presented here is taken directly from the Seventh Revision of the International Lists of Causes of Death, 1955. It has been prepared for those persons who wish to refer to the *International Statistical Classification of Diseases, Injuries and Causes of Death* but do not have available a copy of the Manual. For classification of diseases or causes of death it is necessary to use the complete Manual which consists of two volumes.

In accordance with the Regulations regarding Nomenclature (including the Compilation and Publication of Statistics) in respect to Diseases, and Causes of Death each Member State of the World Health Organization should use the *International Statistical Classification of Diseases, Injuries and Causes of Death* in the coding of mortality statistics and should adopt a form of medical certificate of the cause of death to conform to the model prescribed by the World Health Organization. A copy of this certificate and the Regulations regarding Nomenclature appear in Volume I of the Manual of the *International Statistical Classification of Diseases, Injuries and Causes of Death*.
