16th SESSION OF THE REGIONAL COMMITTEE

Washington D.C., August 31 – 11 September 1964

RESOLUTION

CD15.R19

**ESTIMATED REQUIREMENTS FOR THE SPECIAL MALARIA
FUND OF THE PAHO**

THE 15th DIRECTING COUNCIL,

Having examined the report of the Director on the estimated requirements for the Special Malaria Fund of PAHO (Document CD15/6);

Bearing in mind the efforts of the Governments to eradicate malaria in their territories in order to attain the objectives established in Title I of the Charter of Punta del Este and in Resolution A.2 appended to the Charter;

Considering that, despite the progress achieved, there are still problem areas in which the transmission of malaria persists and that require greater technical assistance from PAHO;

Bearing in mind the extremely valuable voluntary contributions and is even increasing it wherever supplementary measures are necessary;

Bearing in mind the extremely valuable voluntary contributions to the PAHO Special Malaria Fund made by certain Governments, in particular the Government of the United States of America through its Agency for International Development; and

Considering that, in making regular contributions to the PAHO Special Malaria Fund, the countries and territories that are already completely or partly free of malaria transmission will indirectly protect their own areas against the reintroduction of this endemic disease,

RESOLVES

- 1.To take note of the amounts needed to meet the requirements of the Special Malaria Fund of PAHO in 1965, as indicated in Document CD15/6.
- 2.To express appreciation to UNICEF for its decision to continue and even to increase its financial cooperation for the eradication of malaria in those countries that are in need of special assistance in order to interrupt transmission in areas where there are technical problems.
- 3.To urge the Governments of the countries or territories that are already wholly or partly free of malaria to contribute regularly to the PAHO Special Malaria Fund.
- 4.To again thank the Governments that have contributed to the PAHO Special Malaria Fund, especially the Government of the United States of America, for their continued contributions to the Fund [so that] the Pan American Sanitary Bureau [could] provide the technical assistance requested by the Governments of the Hemisphere.
- 5.To again emphasize to the Governments of the Americas that malaria eradication should be considered an essential factor in economic development in rural areas, and that they should make every effort to promote the malaria campaign until eradication has been achieved.
