PROPOSED RESOLUTION

(Submitted by the Representative of Venezuela)

REGISTER OF AREAS WHERE MALARIA IS ERADICATED

The Directing Council,

Bearing in mind that the program of continent-wide malaria eradication is already well advanced, and that various countries report considerable areas already free of the disease; and

Considering the need to employ the most careful epidemiological techniques in order to ensure that malaria has been completely eliminated in a given territory,

RESOLVES:

To request that the Director study the possibility of establishing in the Pan American Sanitary Bureau a "Register of Areas Where Malaria is Eradicated," as well as the conditions that Member Governments should fulfill to request that a given area be included in the aforesaid Register, and that he report the results of his study to the 40th Meeting of the Executive Committee.
