## **38<sup>th</sup> ORDINARY MEETING**

### **FINAL REPORT**

#### **1. OPENING SESSION**

The opening session Chair consisted of Mr. Ricardo Dantas, Administrative Secretary, representing Mr. Eduardo Campos, Governor of the State of Pernambuco; Mr. Odasy Amorim, State Representative and member of the Pernambuco Agricultural Commission; Dr. Guilherme Henrique Figueiredo Marques, Head of the Animal Health Department, representing Mr. Wagner Rossi, Brazilian Minister of Agriculture, Livestock, and Supply; Dr. Erivânia Camelo de Almeida, General Manager, Pernambuco's Agriculture and Livestock Defense Agency (ADAGRO); Ms. Modesta Vaca, President of Bolivia's Cattle-raisers Confederation (CONGABOL); Dr. Dwight Walrond, Head of Guyana's Veterinary Service and Chairman of the 37th COSALFA; Mr. Diego Victoria, Engineer, representative of the Pan-American Health Organization/World Health Organization (PAHO/WHO) in Brazil, representing Dr. Mirta Roses Periago, Director of PAHO/WHO; and Dr. Ottorino Cosivi, Director of the Pan-American Center for Foot-and-Mouth Disease (PANAFTOSA/PAHO/WHO).

A minute of silence was observed in a posthumous tribute to recently deceased Mr. José Alencar, former Vice President of the Federative Republic of Brazil.

After the national anthem, Mr. Ricardo Amorim took the floor to extend a welcome to the participants and to stress the importance of rural agricultural and livestock production, particularly of caprine and ovine production in the Northeast, as well as pointing out the potential for improvement of the intraregional, national, and worldwide food trade, given the improvement of sanitary quality that can be achieved, among other aspects, as a result of the eradication of foot-and-mouth disease (FMD).

Speaking on behalf of the Minister of Agriculture, Dr. Guilherme Marques extended special greetings to the delegations and stressed the importance and feasibility of achieving the objective of FMD's eradication on the American continent. He mentioned that Brazil faces some internal challenges, one of which is posed by the Northeast, but added that Pernambuco will be one of the next states to be presented to the OIE for recognition as a free zone with vaccination. He added further that by making all Brazilian states FMD-free it will be possible to act in the bloc, in an international context, and that to this end it is necessary to continue counting on the support of international cooperation organizations, particularly of PANAFTOSA. He concluded by saying that the absence of Minister of Agriculture from the meeting was due to his participation in the funeral of the Vice President of the Republic, of whom he drew a brief profile.

On behalf of PAHO/WHO's Director, Dr. Cosivi paid special thanks to the representatives of the Veterinary Care Services, the private organizations and entities of the countries, as well as the

international cooperation agencies for attending the meeting. He pointed out that COSALFA's strength lies in public/private participation, although the achievement of FMD-free status with vaccination of 88 percent of the continent's bovine herd is still an incomplete task which increasingly requires the participation of cattle-raisers organizations. He added that the region has the capability and the requisite technical knowledge to meet these challenges. He recalled that last year the 2011-2020 PHEFA Action Plan was formulated as the coordinating axis of cooperation and the catalyst of eradication efforts. He highlighted the success of the Pre-COSALFA Seminar, attended by 350 participants. He thanked MAPA and the Pernambuco government for their cooperation and ended by expressing hope for the meeting's success.

On behalf of PAHO/WHO's Director, Mr. Victoria greeted and thanked the countries' representatives for attending the meeting. He pointed out that, thanks to the host country's support, PANAFATOSA has, since its establishment nearly sixty years ago, recorded major achievements related to FMD eradication. This notwithstanding, the final goal is yet to be reached and requires the joint efforts of the different sectors and players that have managed to ensure that the majority of the South American herd is FMD-free. This represents a major contribution to world nutrition and food security. Mr. Victoria reiterated PAHO/WHO's commitment to supporting PANAFATOSA's work in conjunction with the countries toward the achievement of PHEFA's final objective.

Pernambuco's Secretary greeted the countries' delegates and expressed hope and optimism that the Northeastern states and Pernambuco in the first place will soon join Brazil's FMD-free area.

At the close of the opening session, Dr. Dwight Walrond, 37th COSALFA's President, called for the presentation of candidates for the meeting's chairman and secretary positions, which fell respectively on Dr. Guilherme Marques and on David Rojas, the official delegate of Bolivia's National Agricultural Health and Food Safety Service (SENASAG).

The chairman submitted the provisional agenda to consideration. The agenda, which was unanimously approved without modifications, is appended to this report.

## **2. EX OFFICIO SECRETARY'S OFFICE REPORT**

Dr. Cosivi presented the report of the Ex Officio Secretary's Office, which covers three fundamental aspects: the foot-and-mouth disease situation in South America, the extent of compliance with the 37th COSALFA's resolutions, and other activities of cooperation in respect of FMD.

After the report was read, the Chairman placed it under consideration. The official delegates of Argentina, Peru, Colombia, and Venezuela took the floor to suggest formal corrections to the document. These corrections were noted by the Secretary.

PANAFATOSA's Director and the PAHO/WHO Representative in Brazil answered to the concerns expressed about PANAFATOSA's institutional development, saying that this is a proposal at the initial phase of formulation and that it will be communicated to the countries in due time. Different delegates from both the private and the public sector stressed the importance of PANAFATOSA's strengthening and of its role as PHEFA's leader and coordinator.

In response to questions raised by the delegates of Brazil and Colombia about PANAFATOSA's future,

Dr. Cosivi and Mr. Victoria expressed their appreciation and gratitude for Brazil's financial support for the Center's maintenance, and explained that the institutional development fits into the strategy of mobilizing extra-budgetary resources and knowledge management. The delegates expressed their concern that this initiative could be limited to the cooperation's response capacity in respect of foot-and-mouth disease, pursuant to the priority set under the Cooperation Agreement celebrated between PAHO and the Brazilian Government in the 1950s. Different delegates concurred in asking PAHO/WHO to maintain and reinforce PANAFTOSA's technical cooperation and to appropriate resources for the final stage of FMD eradication.

After discussion of the Report, at the request of the Colombian private sector's delegate, endorsed by the Brazilian official delegate, the paragraph on PANAFTOSA's institutional development was deleted, after which the aforementioned Report was approved.

### 3. THE FOOT-AND-MOUTH DISEASE SITUATION IN SOUTH AMERICA

This presentation is available at <http://new.paho.org/panaftosa>.

Next, Dr. Naranjo, PANAFTOSA Consultant, offered an analysis of the foot-and-mouth disease situation in South America, from the region's overall perspective. He pointed out that of the 177 OIE member countries, 65 are FMD-free without vaccination; 13 have FMD-free territories with and without vaccination; and 99 countries fail to meet this condition, in most of which the disease is endemic. He also stressed the emergency situation in some countries of Asia and Africa.

In respect of South America, Dr. Naranjo said that the progress achieved toward eradication is maintained, as 72 percent of the territory and 88 percent of the bovine and bubaline herd are FMD-free with and without vaccination. To maintain the status arrived at, the countries' Veterinary Care Services employ prevention strategies that include seroepidemiologic research, population immunity studies, and reinforcement of actions along international border areas, among other initiatives. In some South American areas that are not yet FMD-free, some are expected to be declared free in the Brazilian Northeast and in the Peruvian Northwest, while international support for the official programs of Ecuador, Bolivia, and Venezuela is being reinforced. Dr. Naranjo concluded his presentation by saying that a report shortcoming is due to the lack of reports from Guyana and Venezuela and to the delay in the submission of reports.

Interventions by several delegates made possible the clarification and complementation of information regarding the programs' budgetary aspects, vaccine manufacturing and availability, quality control systems, diagnostic of vesicular diseases, and availability of virus strains, among other important issues. Colombia called attention to the low detection of vesicular stomatitis, which might lead to the supposition of either low sensitivity of surveillance systems or of a drastic reduction of the disease's occurrence in the countries. PANAFTOSA was asked to revise Table 19 of the Report.

On behalf of the Permanent Veterinary Committee of the Southern Cone (CVP), Dr. Dillon asked the Chair to proceed with the reading of the minutes of the meeting coordinated by OIE at the CAN headquarters last March, in connection with the results of the reference laboratories test results, regarding the FMD diagnostic of the biologic material submitted by AGROCALIDAD, Ecuador.

## 4. SITUATION OF THE FOOT-AND-MOUTH DISEASE IN ECUADOR

### 4.1 National Program

Dr. Alejandra Burbano, official delegate of the Ecuadorian Agricultural Quality Assurance Agency (AGROCALIDAD), presented the structure, objectives, and components of the national foot-and-mouth disease eradication program, assigned priority by the national government. Her presentation was complemented by Dr. Jorge Rosero, AGROCALIDAD epidemiologist, who stressed the actions to control the epidemic FMD 2009 and 2010 outbreaks, including perifocal vaccination with bivalent O1 field and A24 Cruzeiro vaccine.

As to spatial distribution, special attention was given to the epidemic's occurrence in areas of extensive cattle raising as well as to the disease's seasonal occurrence, which is heightened in the months of April, May, and June, associated with the movement of animals from the breeding to the fattening zones.

The presentation concluded with a reiteration of the pressing need for an anti-endemic vaccination strategy coordinated and inspected by AGROCALIDAD, and for strict control of the movement of animals, which falls also under the responsibility of the official service.

The Ecuadorian private sector delegate complimented AGROCALIDAD and assured it of CONEFA's commitment to cooperate with the eradication project. He took the opportunity to thank the Brazilian private sector for the offer of financial assistance in cooperation with FMD eradication in the country.

### 4.2 Laboratory Diagnostic

Dr. Rossana Allende, PANAFTOSA Consultant, presented the results of the PANAFTOSA reference laboratory study of samples submitted by AGROCALIDAD/Ecuador, pertaining to the FMD foci recorded in 2010. She explained in detail the analysis methodology used and the interpretation of the results, which led to the conclusion that the FMD strains active in Ecuador belong to the O1 subtype and to the Euro-South American toptype. She added that genetic modifications were detected in some samples, the epidemiologic impact of which is still unknown. She also said that the vaccine matching results obtained with the methodology employed indicate that vaccines of proven quality prepared with the O1 field strain are a useful tool for controlling foci, provided they are used under systematic vaccination programs, including all animal categories and strict control of animal movements.

After her presentation, Dr. Dillon insisted once again on the inclusion of the Lima meeting minutes in the COSALFA Report, but his proposal was not endorsed by the delegations. Dr. Dominguez, though, supported the proposal, adding that CAN's resolution establishes the mechanisms for following up the actions to be carried out. The Brazilian official sector delegate recommended that a coordinated work plan be set up among the reference laboratories and that PHEFA's coordinating group, to be soon designated, should attach maximum priority to follow-up.

The Ecuadorian private sector's delegate expressed the opinion that the vaccine works efficiently and that the publicizing that it does not confer immunity was inappropriate. He thus suggested that the official sector should participate in the activities and in the interpretation of the results of laboratory studies, an observation with which Ecuadorian official sector's delegate concurred.

To a question from the Brazilian official sector's delegate about the production of anti-FMD vaccine with the O Taiwan virus by an Argentine laboratory, Dr. Maradei, of Argentina's SENASA laboratory, replied that inactivated antigens were used and that once the procedure was finished, that virus ceased to exist. Dr. Dillon assured that inactivated O Taiwan virus no longer exists in Argentina and that there will be no manipulation of virus exotic to the continent for commercial purposes.

## 5. THE FOOT-AND-MOUTH DISEASE SITUATION IN VENEZUELA

As Venezuela's report has not been incorporated into the report on the countries' situation, the Chair asked the official Venezuelan delegate to make a presentation on his country's eradication program and on the disease's situation. His presentation is available at: <http://new.paho.org/panaftosa>.

His exposition addressed the vaccination systems aimed at small-scale producers, the control of animal movements, and the country's epidemiologic situation in 2010.

After the report's presentation, the delegates expressed concern over the vaccination coverage level, the total bovine population, the biological products used, and the public-private relationship.

## 6. REGIONAL COOPERATION PROGRAMS

### 6.1 Food and Agriculture Organization of the United Nations (FAO)

Dr. Julio Pinto, FAO/EMPRES, Rome, began his presentation by pointing out that the FMD control and eradication programs coordinated by FAO are grounded on the identification of ecosystems affected by groups of virus and serotypes worldwide. These programs are under way in different continents and countries, including CAN countries, and are carried out under the GFTADs and the Progressive Control Pathway (PCP), conceived as a FAO-OIE joint working tool, to be used for the validation of official FMD control programs. PCP encompasses six stages of the programs' progressive advance; at stage 3 they can be validated by OIE as an advanced FMD control program. He said that the global strategy will be submitted to the OIE Assembly in March 2011, that the terms of reference have been drawn up, and that the FAO-OIE working group is to be designated for implementing this strategy.

Given the concerns raised on the floor, Dr. Sergio Duffy, member of OIE's Scientific Commission, explained that the general objective of an official FMD control program validated by OIE is to promote the gradual improvement of the program and of the epidemiologic situation, and ultimately to ensure that they lead to an FMD-free sanitary status. The countries may voluntarily ask for an evaluation of their official FMD control program. This does not necessarily mean that a different sanitary status will be recognized.

The Brazilian official sector's representative, supported by several COSALFA members, mentioned the inconvenience of the PCP's application to South America countries, because methodologies, experiences, and necessary organizational structures for qualification and establishment of the progressive stages are not known, and because the task of eradication in the Americas has been carried out for three decades under PHEFA, involving a long trajectory of application, methodologies, and

procedures agreed by the countries for verification and international recognition of their epidemiologic status.

Dr. Ana Riviere, a FAO official, complemented Dr. Pinto's presentation, providing details on the Integrated Regional Project for the Progressive Control of FMD in the Andean Subregion, with grants from the Governments of Spain and Italy. This presentation is available at <http://new.paho.org/panaftosa>.

After the presentation, the delegates of the CAN countries thanked FAO for the cooperation received, particularly for carrying out activities along international borders. Venezuela's delegate mentioned that he sees the FAO project as an opportunity for PHEFA's advancement.

FAO Regional Representative, Dr. Tito Díaz, thanked the countries for their positive statements and explained that at the meeting at which the Project was launched at CAN, it was incorporated into PHEFA, coordinated by PANAFTOSA, as well as into the FAO-PANAFTOSA 2008 Agreement.

The delegate of Bolivia's CONGABOL stressed the private sector's responsibility in respect of PHEFA, but expressed concern over the slow pace of her country's official program. In this connection, the delegate representing Colombia's cattle raisers pointed out as an example of success the FEDEGAN-ICA Agreement and sounded an alert against the danger of undertaking other work agreements in our region aside from PHEFA.

The Chair suggested the drafting of a resolution urging the countries to abide by the commitments undertaken toward PHEFA to prevent work agreements liable to be in conflict with the continental program's political/strategic lineaments.

## **6.2 Inter-American Institute for Cooperation on Agriculture (IICA)**

Dr. Manuel Otero, IICA's Representative in Brazil, stressed the importance of food security and food safety as priority cooperation components for improving competitiveness and food security. He referred to the instrument known as Performance, Vision, and Strategy (PVS) as a working tool to support the countries in reviewing and adjusting their planning. He pointed out the agreements with PVS, the Southern Cone Plant Health Committee-COSAVE, and the Mercosur Meat Forum, among others. In conclusion, he pointed out that successful eradication depends on the sum of public and private efforts and on an ever closer coordination with the international organizations.

## **6.3 World Organization for Animal Health (OIE)**

Dr. Martin Santiago Minassian, representing OIE, informed participants about OIE's activities. His presentation is available at: <http://new.paho.org/panaftosa>.

He referred to the animal health concepts as a national public good, [contributing to] one world, overall health, and veterinary services' good governance. Lastly, he referred to PVS as a tool for evaluating the performance of the veterinary services.

## 7. SUBREGIONAL COOPERATION AGREEMENTS

### 7.1 Andean Community of Nations (CAN)

Dr. Rosa Guerrero, representing CAN, presented a report on the activities under the Andean Subregional FMD Control and Eradication Project in the 2010-2012 biennial, in respect of the components aimed at the strengthening of the national programs, border area plans, and their follow-up and evaluation.. The report is available at: <http://new.paho.org/panaftosa>.

### 7.2 Permanent Veterinary Committee of the Southern Cone (CVP)

Dr. Carlos Peñaranda, CVP Technical Secretary, offered information on the Committee's activities. His presentation is available at: <http://new.paho.org/panaftosa>.

He stressed that the objective is to coordinate actions and enhance the regional capability to prevent, control, and preclude the sanitary risks that affect the production and marketing of animals and of products and byproducts of animal origin in the region. He highlighted the actions undertaken in coordination with the FMD-free Mercosur Action Program (PAMA) and PANAFTOSA. Bolivia expressed appreciation for CVP/PAMA's follow-up of the Plan of Assistance to Bolivia.

## 8. PHEFA: MONITORING AND EVALUATION

Dr. Naranjo recalled that PHEFA calls for the appointment of a working group to monitor the Action Plan, as reiterated at various moments by the meeting participants. He also said that in addition to the working group's appointment, it is necessary to establish work plans and to define the information to be submitted by the countries, as well as the pertinent monitoring instruments and mechanisms. The Chair suggested the drafting of a resolution on the setting-up of the group and the work plan, a suggestion shared by the delegations.

## 9. PRE-COSALFA SEMINAR REPORT

Participants were appraised of the COSALFA International Seminar Report presented by Dr. Vitale and which is available at: <http://new.paho.org/panaftosa>.

The seminar participants expressed their satisfaction over the seminar results and found that it served to discuss different topics related to the FMD control in the different forms in which it occurs. Work experiences were shared and the seminar was considered a good opportunity for training, particularly of field workers of the host country, who participated in the seminar in great numbers.

Before closure, the Paraguayan delegation offered its country as the host of the next COSALFA meeting. The offer was unanimously accepted and appreciated.

## 10. CLOSING CEREMONY

The main table consisted of Drs.: Ottorino Cosivi, José Naranjo, and Guilherme Henrique Figueiredo Marques.

Dr. Cosivi in his position of ex officio Secretary thanked the presence of all and the support of the public and private institutions for the holding of this meeting and considered closed the 38th COSALFA.

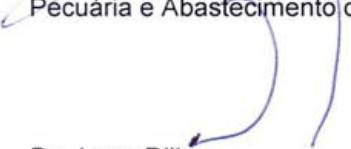

IN WITNESS WHERE OF, the Chairman of the Meeting, Dr. Guilherme Henrique Figueiredo Marques, Director of the Animal Health Department of the Ministry of Agriculture, Livestock and Supply (MAPA), the Director of the Pan-American Foot-and-Mouth Disease Center – PANAFTOSA-PAHO/WHO, Secretary *ex officio* of COSALFA, Dr. Ottorino Cosivi and the Delegates of the public and private sectors of the member countries, have signed the present list of participants at the 38 COSALFA Ordinary Meeting, held in Recife, Pernambuco, on March 31 and April 1st, 2011.

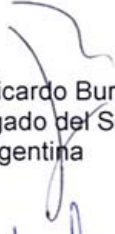

Dr. Guilherme Henrique F. Marques  
Director del Departamento de Sanidad  
Animal del Ministério da Agricultura,  
Pecuária e Abastecimento do Brasil

Dr. Ottorino Cosivi  
Secretario *Ex Officio*  
Director del Centro Panamericano de  
Fiebre Aftosa – PANAFTOSA-OPS/OMS

Dr. Jorge Dillon  
Delegado del Sector Publico  
de Argentina

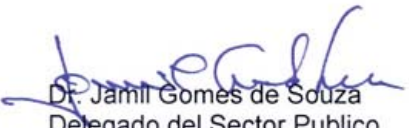

Dr. Ricardo Burgos  
Delegado del Sector Privado  
de Argentina

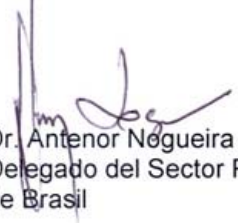

Dr. René David Rojas  
Delegado del Sector Publico  
de Bolivia

Dra. Modesta Marco de Vaca  
Delegado del Sector Privado  
de Bolivia

Dr. Jamil Gomes de Souza  
Delegado del Sector Publico  
de Brasil

Dr. Antenor Nogueira  
Delegado del Sector Privado  
de Brasil

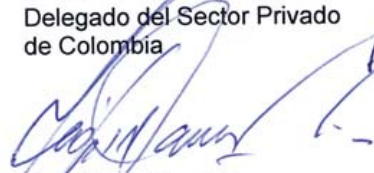

Dra. Miryam Luz Gallego  
Delegado del Sector Publico  
de Colombia

Dr. Luis Fernando Salcedo  
Delegado del Sector Privado  
de Colombia

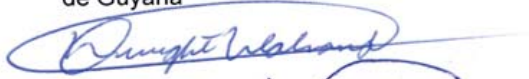

Dra. Alexandra Burbano  
Delegado del Sector Publico  
de Ecuador

Dr. Teófilo Carvajal  
Delegado del Sector Privado  
de Ecuador

de Paraguay

Dr. Oscar Miguel Domínguez Falcón  
Delegado del Sector Publico  
de Perú

Dr. Luis Eduardo Díaz  
Delegado del Sector Publico  
de Uruguay

Dr. Leopoldo Amorin  
Delegado del Sector Privado  
de Uruguay

Dr. Wilmer Alcazar  
Delegado del Sector Publico  
de Venezuela

# **38<sup>th</sup> COSALFA**

**Recife, Pernambuco - Brazil**

March 31 - April 01, 2011

## **RESOLUTIONS**

## RESOLUTION I

### Strategic Technical Framework for Eradication of Foot-and-Mouth Disease in the Americas

COSALFA'S 38TH REGULAR MEETING,

Considering:

- That since 1988 a Hemispheric Program for the Eradication of Foot-and-Mouth Disease in the Americas (PHEFA) has been in place as the strategic/technical framework approved and adopted by the countries of the Americas under which the process of eradication of foot-and-mouth disease on the American continent is being carried out, with major achievements by the countries;
- That at COHEFA's Second Special Meeting, held in December 2010, the delegates of the American countries approved the new 2011-2020 PHEFA Action Plan which under PANAFTOSA's coordination is the strategic technical framework for eradication of foot-and-mouth disease on the American continent;
- That the FAO and the OIE have agreed to undertake worldwide actions under the Progressive Control Pathway for Foot-and-Mouth Disease Control in accordance with the GFTADs; and
- That PHEFA is at an advanced stage in South America, where 88 percent of bovine herds enjoy the status of foot-and-mouth disease free;

RESOLVES:

1. To reiterate that PHEFA is the strategic, technical framework adopted by the countries with a view to eradication of foot-and-mouth disease.
2. To ask international and regional cooperation organizations as well as the countries to devise and implement their cooperation plans in respect of foot-and-mouth disease in accordance with the 2011-2020 PHEFA Action Plan.

(Approved at the plenary session of April 1, 2011)

## RESOLUTION II

### Analysis of the tests on FDM virus samples from Ecuador

COSALFA'S 38TH REGULAR MEETING,

Considering:

- That the results of laboratory studies done by PANAFTOSA on samples submitted by AGROCALIDAD/ Ecuador pertaining to foci recorded in 2010 were presented in a summary fashion;
- That the analysis methodology used for their interpretation was substantiated;
- That it was concluded that the FMD strains active in Ecuador in 2010 belonged to the 01 subtype and to the Euro-South American topotype, and that genetic modifications were present in some samples;
- That some data in AGROCALIDAD's information and surveillance system do not support evidence that these modifications have caused a significant negative impact;
- That although they did not coincide with the vaccine matching analyses, the results of OIE reference laboratories did coincide in recommending that for the next vaccination cycle the same type of vaccine current in the region be used, and that a vaccine of proven potency be used according to the criteria established by the official veterinary service of the country of origin of the biologic material;
- That there are results and interpretation discrepancies among the different laboratories as regards the vaccine matching tests, which were discussed at the OIE reference laboratories meeting (Lima, March 14-15, 2011); and
- That Ecuador's Official Service asked PANAFTOSA to coordinate all technical cooperation activities (field and laboratory) directed at Ecuador;

RESOLVES:

1. That PANAFTOSA should coordinate the complementary studies (field and laboratory) of strains isolated from FDM foci in Ecuador, in close cooperation with AGROCALIDAD, taking into account the recommendations of the meeting of OIE reference laboratories (Lima, March 14-15, 2011).

(Approved at the plenary session of April 1, 2011)

## RESOLUTION III

### **ANDEAN AREA: Strengthening of national foot-and-mouth disease eradication programs and actions along international borders**

COSALFA'S 38TH REGULAR MEETING,

Considering:

- Ecuador's and Venezuela's commitment and efforts to overcome structural and operational limitations of the foot-and-mouth disease control and eradication programs;
- Recognition of the high risk posed by areas along these countries' international borders for Colombia as an FMD-free country with vaccination;
- The wish expressed by the Ecuadorian and Venezuelan delegates at the International Seminary and at the COSALFA meeting about the need to reinforce the joint, harmonic work in the international border areas; and
- The interest and wish expressed by the Venezuelan delegate to receive technical cooperation from PANAFTOSA and other international cooperation organizations for the country's national program and international border area;

RESOLVES:

1. To ask Ecuador's and Venezuela's Official Services and delegates to commit themselves in earnest to their systematic organization and to participation in binational border meetings with Colombia, Guyana, and other neighbor countries.
2. To urge PANAFTOSA to attach priority to and coordinate technical cooperation to the countries involved and to participate actively in the programming and follow-up of work commitments agreed at international border meetings.

(Approved at the plenary session of April 1, 2011)

## RESOLUTION IV

### Implementation of PHEFA'S Follow-up Mechanism

COSALFA'S 38TH REGULAR MEETING,

Considering:

- That as Resolution II of the Second COHEFA Special Meeting reasserts that PNAFTOSA should be entrusted with the management of the 2011-2020 PHEFA Action Plan, [the decision is made] to ask PANAFTOSA to set up a working group with the countries to follow up the 2011-2020 PHEFA Action Plan at COHEFA.

RESOLVES:

1. To urge PANAFTOSA to set up within sixty days the working group to start the establishment and implementation of the 2011-2020 PHEFA Action Plan's follow-up mechanism.

(Approved at the plenary session of April 1, 2011)

## RESOLUTION V

Support of PANAFTOSA and adherence to the Trust Fund for financing technical cooperation

COSALFA'S 38TH REGULAR MEETING,

Considering:

- The fundamental role played in the fight against foot-and-mouth disease by the Pan-American Foot-and-Mouth Disease Center, a crucial factor for the significant progress achieved toward FMD eradication on the continent;
- The Brazilian Government's significant, generous, and consistent support to the financing and maintenance of the PANAFTOSA facilities in Duque de Caxias, Rio de Janeiro, over the last sixty years;
- The consistent political and technical support of the Pan-American Health Organization to the cause of FMD eradication on the continent, channeled through PANAFTOSA as well as through its various units and representations on the continent;
- The need to reinforce the combat actions at the last stage of eradication pursuant to the PHEFA Action Plan, particularly in the priority countries and zones; and
- The recent establishment by PAHO/WHO of a mechanism for financing PANAFTOSA's technical cooperation through a Trust Fund.

RESOLVES:

1. To express appreciation and gratitude to the Brazilian Government and to PAHO/WHO for their invaluable support to the countries in respect of FMD eradication on the continent.
2. To ask both the Brazilian Government and the Pan-American Health Organization's Director to continue the support they have provided over the last sixty years.
3. To urge the countries, cattle-raisers organizations, and sectors of the livestock production chain to adhere to the aforesaid mechanism, to subscribe to the respective agreements, and to make contributions to the extent of their possibilities.
4. To recommend that the official sectors make budgetary appropriations for contributing to the Trust Fund.

(Approved at the plenary session of April 1, 2011)

## RESOLUTION VI

### Ecuadorian Official Service's FMD Eradication Program

COSALFA'S 38TH REGULAR MEETING,

Considering:

- The substantial, detailed information provided by the Ecuadorian Delegation on the FMD sanitary situation in Ecuador and of the country's eradication program;
- Ecuador's need to strengthen its Official Veterinary Service to meet fully the requirements of the FMD eradication programs pursuant the stated regional eradication objectives;
- The need to strengthen the forthcoming immunization campaigns and the control of animal movements with official short- and medium-term actions;
- The need to coordinate the assistance and technical cooperation efforts to make them more effective and efficient; and
- The Ecuadorian Delegation's request to PANAFTOSA to maintain and attach priority to technical cooperation to Ecuador;

RESOLVES:

- 1.To express to the Ecuadorian Government the COSALFA delegates' satisfaction over its political determination to assign the FMD eradication program to the category of "Emblematic Program," as well as complimenting the efforts of AGROCALIDAD, its Official Veterinary Service, toward the reformulation and strengthening of the FMD eradication program under its responsibility.
- 2.To ask PANAFTOSA to maintain, on a priority basis, and to coordinate the technical cooperation it is extending the Official Sanitary Service, particularly in respect of vaccination campaigns, animal movement, and laboratory diagnostic.
- 3.To urge the countries and cooperation organizations pertaining to FMD to concentrate their efforts in support of the official sanitary service, in coordination with PANAFTOSA.

(Approved at the plenary session of April 1, 2011)

## RESOLUTION VII

### Strengthening of Venezuela's foot-and-mouth disease eradication program

COSALFA'S 38TH REGULAR MEETING,

Considering:

That the Venezuelan Delegation asked PANAFTOSA/PAHO/WHO to undertake, jointly with FAO, technical advisory missions to Venezuela for the following purposes:

- To characterize the country epidemiologically and to do its zoning;
- To evaluate and to strengthen the national FMD combating program, placing emphasis on support for the preparation of a legal framework; and
- To set up and hold meetings for establishing the border action plan with Colombia, Guyana, and Brazil.

RESOLVES:

1. To express to the Government of the Bolivarian Republic of Venezuela the COSALFA 38 delegate' satisfaction over the interest shown by the Venezuelan Delegation in receiving support and technical cooperation from cooperation agencies of the countries of the region.
2. To accomplish the preceding, PANAFTOSA is asked to coordinate the first working meeting provisionally scheduled for the first week of May 2011.

(Approved at the plenary session of April 1, 2011)

## RESOLUTION VIII

### Strengthening of Bolivia's foot-and-mouth disease eradication program

COSALFA'S 38TH REGULAR MEETING,

Considering:

- The technical cooperation extended by PANAFTOSA and the countries of the Southern Cone to the Official Sanitary Service of the Plurinational State of Bolivia;
- The progress achieved owing to the implementation of the adjustments to the National Foot-and-Mouth Disease Eradication Program;
- The determination shown by the Bolivian Government to address the phase of foot-and-mouth eradication;
- The thoughts expressed by the Bolivian private sector's delegate on better coordination and integration of the official service with the provincial services and the private sector pursuant to the country's new political-administrative order and the PHEFA guidelines.

RESOLVES:

1. To ask PANAFTOSA to continue to assign priority to the technical cooperation it extends to Bolivia's FMD Eradication Program.
2. To recommend that Bolivia's Official Service ensure the incorporation of the private sector and the provincial governments as part of the country's sanitary structure.

(Approved at the plenary session of April 1, 2011)

## RESOLUTION IX

Expression of appreciation to COSALFA 38's host country

COSALFA'S 38TH REGULAR MEETING,

Considering:

- The warm reception and hospitality shown by the official authorities and representatives of private sector of Brazil, particularly of the State of Pernambuco, represented by the staff of the Agriculture and Livestock Defense and Inspection Agency-ADAGRO and of the Brazilian Ministry of Agriculture, Livestock, and Supply-MAPA in connection with COSALFA 38's Regular Meeting and the International Pre-COSALFA Seminar.

RESOLVES:

1. To thank the Government of the Federative Republic of Brazil, as represented by Dr. Erivânia Camelo de Almeida, Head of the Animal Health Department, Ministry of Agriculture, Livestock, and Supply-MAPA; the Brazilian private sector, represented by the Brazilian Agriculture and Livestock Confederation-CNA; and Brazil's veterinary pharmaceutical industry and other sector entities for their generous, warm hospitality during the Seminar and the Meeting.

(Approved at the plenary session of April 1, 2011)

## RESOLUTION X

Designation of the Location for COSALFA 39

COSALFA'S 38TH REGULAR MEETING,

Considering:

- The friendly, generous offer of the Paraguayan Delegation to host the next COSALFA; and
- The expressions of support and agreement of the other delegations to the Paraguayan Delegation's offer.

RESOLVES:

To accept with thanks Paraguay's offer to host COSALFA 39 in a city and on a date to be defined later.

(Approved at the plenary session of April 1, 2011)
