Mexico	<b>262</b>
Paraguay	<b>140</b>

### COVID-19 – Highlights

- On 8 June, according to a **Peru** Ministry of Health (MoH) press release, the Regional Health Directorate of Amazonas (DIRESA as per its acronym in Spanish) began vaccinating with the second dose of the AstraZeneca vaccine in adults aged 70 and 80 years and over. The report is available in Spanish at: <https://bit.ly/3wdrRAH>.
- In **Canada** as of 8 June 2021 a total of 30,479 confirmed positive cases of COVID-19 among First Nations and Inuit communities have been recorded in the country, of which 839 are active cases, 29,292 have recovered and 348 deaths have been reported. Additionally, a total of 540,581 doses of the COVID-19 vaccines have been administered among indigenous population, of which 197,249 have completed the second dose. The full reports are available at: <https://bit.ly/3g8CQWp>, and <https://bit.ly/3ir6jMZ>
- On 8 June, the **United States** CDC Morbidity and Mortality Weekly Report included an article regarding the decrease in COVID-19 cases, Emergency Department visits, hospital admissions, and deaths among older adults following the introduction of COVID-19 vaccines from 6 September 2020 to 1 May 2021. The full report is available at: <https://bit.ly/3gfKYTO>.

\*Numbers may vary due to differences in reporting

## Region of the Americas

**68,932,684** cases

**1,810,788** deaths

**56**

countries/areas/territories affected

## Global

**173,826,669** cases

**3,749,515** deaths

**236**

countries/areas/territories affected

**Total cases, deaths & CFR (%) among PAHO countries/territories with ≥ 10,000 cumulative cases.**

Country/Territory	Cases	Deaths	CFR (%)
United States of America	33,072,912	592,932	1.8%
Brazil	17,037,129	476,792	2.8%
Argentina	4,008,771	82,667	2.1%
Colombia	3,611,602	92,923	2.6%
Mexico	2,438,011	229,100	9.4%

Venezuela	245,300	2,750	1.1%
Honduras	242,796	6,532	2.7%
Cuba	152,420	1,045	0.7%
Puerto Rico	139,142	2,524	1.8%

## Spotlight – Cuba – PAHO/WHO Country Office Situation Report #69

**Current Situation:** Since the start of the pandemic up to 8 June 2021, there have been 152,420 cumulative confirmed cases of COVID-19 of which 145,337 have recovered and 1,045 deaths were reported in Cuba. As of 9 June, Of the 152,420 cases diagnosed with the disease, 5,982 remain hospitalized, 5,841 of them are in stable clinical condition, 141 in intensive care, of which 54 are in critical condition while 87 are in severe condition.

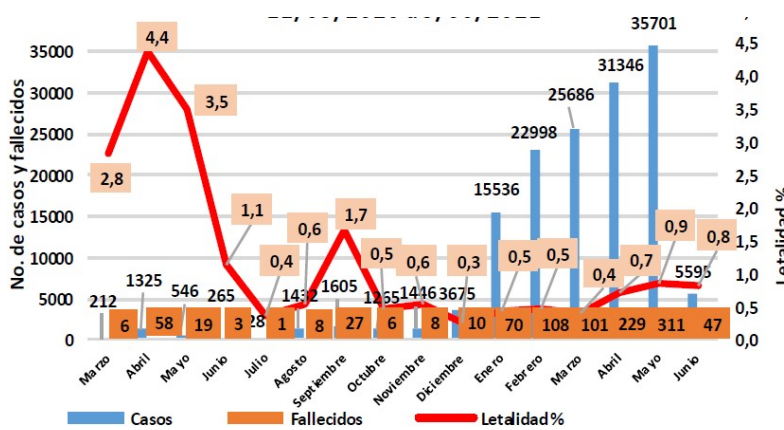

**Epidemiological Trends:** Figure 1 indicates the reported cases of COVID-19 in Cuba per Epidemiological Week (EW)

From EW 11 of 2020 to EW 22 of 2021. The cumulative incidence rates in the last 14 days have decreased in the provinces of Artemisa, La Habana, Mayabeque, Matanzas, Cienfuegos, and Las Tunas. The rest increased, with the largest increases in Santiago de Cuba, Camagüey, Ciego de Avila, and the Isla de la Juventud. Additionally, in the last week, the number active cases continued to decrease, 629 fewer than in the EW 21 week, with an average of 5,919 per day. During the month of May, 35,701 positive cases of COVID-19 were detected in the country, with an average of 1,152 per day, making it the month with the most positive cases since the beginning of the pandemic in the country. In the five days of June, this average has decreased to 1 119. During EW 22, the number of cases continued to decrease with respect to previous weeks. In Havana, an increasing transmission trend continues with the highest incidence rate of 319 per 100,000 population and 6,821 cases. During EW 22 of 2021, 3,151 positive cases were reported, a 16.2% (509 cases) decrease compared to the EW 21; of which 99.3% (3,151) of the cases were autochthonous. Furthermore, in the last 14 days, all municipalities decreased their autochthonous case rates, but continued with figures above 200 per 100,000 population; 10 municipalities were above 300 and only two exceeded 400 per 100,000 population. over 400.

Figure 1: Reported cases from EW 11 of 2020 to EW 22 of 2021.

**Deaths and Mortality Rate:** Figure 2 indicates the positive cases and lethality due to COVID-19 in Cuba from 11 March 2020 to 5 June 2021

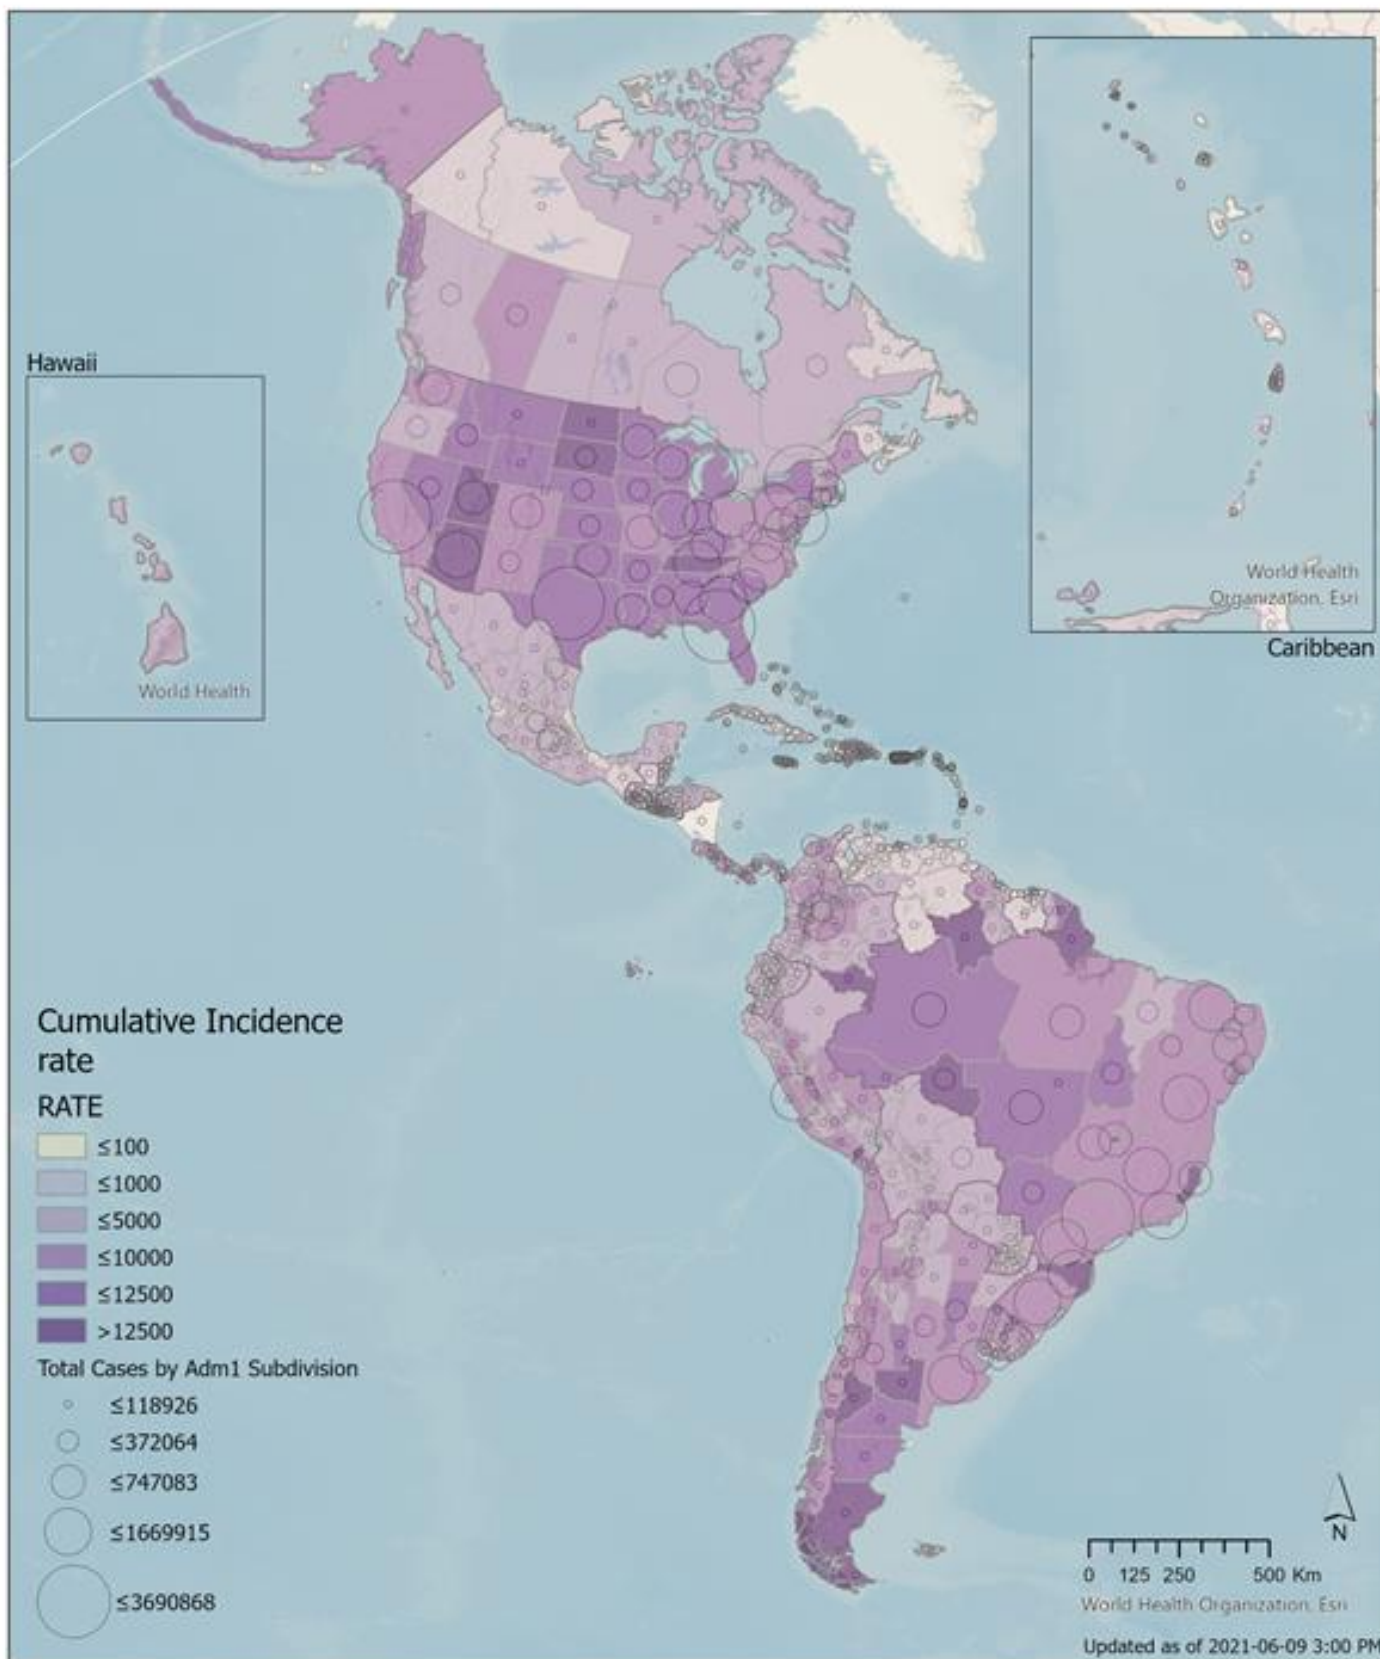

The number of severe cases continued to increase and the percentage with respect to the total number of active cases continued to increase from 2.4% to 2.9% at the by the end of EW 22. The case fatality rate during the month of May remained at 0.9%, and during the first five days of June it increased to 0.8%. The average age of the deceased decreased to 70 years during EW 22. Of the 62 deceased in, 45% had three or more baseline comorbidities, 34% had two, 18% had two, and 3% had none. The capital city apported 41.9% of the deaths during the EW 22 and 57.2% of the severe cases in the country.

**Vaccination:** As of 5 June 2021, 1,745,588 people in Cuba had received at least one dose of a vaccine, representing 15.6% of the country's population. In total, 2,844,862 doses have been administered between clinical trials, intervention studies, and the health intervention. Starting the second half of the month of June, the Ministry of Health has decided to extend to all the municipalities of Havana the sanitary intervention with the three doses of the Abdala vaccine, in view of the complex epidemiological situation in the capital. The purpose is to have the entire population of Havana to have received at least one dose of Abdala Vaccine and 50% of the population with at least two doses. It is expected that by the end of July 2021, the totality of the capital's population will have completed the three-dose schedule.

Table 1: Advances in vaccination with Cuban candidates

	First Dose	Second Dose	Third Dose	Total
Clinical Trial	55,707	54,286	39,371	149,364
Intervention Study	155,914	146,713	117,161	419,788
Health Intervention	1,533,967	740,470	1,093	2,275,530
<b>Total</b>	<b>1,745,588</b>	<b>941,469</b>	<b>157,625</b>	<b>2,844,682</b>

Table notes on the next page

**NOTES:** Case and death counts may include both confirmed and probable classifications depending on the reporting Member State.

- Antibody tests, including rapid diagnostic tests (RDTs) based on antibody detection, are not recommended for use by PAHO/WHO in clinical diagnosis. Antigen-detecting RDTs may be used following the WHO 11 September 2020 Guidance, available at: <https://bit.ly/2FkK2fs>.
- Data is updated on a weekly basis for Guadeloupe, Martinique, Nicaragua, Saint Barthelemy, Saint Martin, and Saint Pierre and Miquelon.
- As of 11 November 2020, the previously aggregated Bonaire, Saba and Sint Eustatius are now being presented separately in the table.
- \*A dispute exists between the Governments of Argentina and the United Kingdom of Great Britain and Northern Ireland concerning sovereignty over the Falkland Islands (the) (Malvinas)

**Argentina:** On 14 March 2021, due to daylight savings time observed in Eastern Standard Time zone, the Argentina data is no longer published by 3:00PM EST same day and is henceforth included in the following day table. Between 22 February and 14 March 2021, the data had corresponded to the same date.

**Bahamas:** According to the latest Bahamas Ministry of Health (MoH) publication, there are a total of 28 additional deaths under investigation, available at: <https://bit.ly/3pOt9zX>.

**Ecuador:** According to a 6 September Ecuador Ministry of Public Health press release, only cases confirmed by RT-PCR will be reported; previously, cases who tested positive by either RT-PCR or RDTs were reported, resulting in the exclusion of 8,956 cases. Available at: <https://bit.ly/3h2EWEA> ...

**El Salvador:** Cumulative cases and deaths as published by the Government of El Salvador: <https://covid19.gob.sv/>. The government presents a retroactively adjusted epidemiological curve of daily cases on the same dashboard.

**Guadeloupe:** Deaths are aggregated for Guadeloupe, Saint Martin and Saint Barthelemy in Sant'Antoine Publique France weekly publications; death counts for Guadeloupe are calculated subtracting deaths in Saint Martin and Saint Barthelemy. Available at: <https://bit.ly/39UMysd>

**Jamaica:** According to the latest Jamaica Ministry of Health and Wellness press release, there are a total of 138 additional deaths under investigation, available at: <https://bit.ly/3qAwLJo>

**Mexico:** On 1 June 2021, the Mexico Ministry of Health reported 4,272 deaths in 24 hours. Of these, 3,924 were reported in 2020 and the remaining were reported in 2021. Available at: <https://bit.ly/3pfdMA8>

**Nicaragua:** Please note there are discrepancies with the data published by the Citizen's Observatory COVID-19 Nicaragua as of 4 June 2021. Available at: <https://bit.ly/3pw7ZVR>

**Peru:** Aggregated case total as reported by the Peru MoH; latest disaggregated data available is 591,983 by RT-PCR + 471,736 by antigen tests + 924,214 by other RDTs. Antibody tests, including RDTs based on antibody detection, are not recommended for use by PAHO/WHO in clinical diagnosis. Antigen-detecting RDTs may be used following the WHO 11 September 2020 Guidance, available at: <https://bit.ly/3fJVKTM>. On 31 May 2021, the Government of Peru announced that, after revision, the death toll was 180,764 deaths as of 22 May 2021, available at: <https://bit.ly/3fYGj8V>. The number of cumulative deaths reported prior to the revision, on 30 May, was 69,342, available at: <https://bit.ly/3pkar2U>.

**Puerto Rico:** Aggregated case total as reported by the Puerto Rico Department of Health (DoH); 129,824 were positive by RT-PCR and 16,778 were positive by antigen tests; previously, cases who tested positive by either RT-PCR or serological RDTs were reported, resulting in the exclusion of 33,965 cases. Available at: <https://bit.ly/2VvjsQ>

**United States of America:** Case and death counts include both confirmed and probable classifications, as published on the U.S. Centers for Disease Control and Prevention (US CDC) website on 9-June. Excludes American Samoa, Federated States of Micronesia, Guam, Commonwealth of the Northern Marianas, Puerto Rico, Palau, Republic of Marshall Islands and the United States Virgin Islands. Case and death counts may differ from other US CDC data sources because these are provisional counts which are subject to change, including updates to data reported previously, adjustments can occur. Sources: <https://bit.ly/2RSpap5> and <https://bit.ly/2RVl2n6>.

**Uruguay:** According to the latest Uruguay Ministry of Public Health report, the total notes 13 positive cases reported in the last 24 hours were excluded from the total. Available at: <https://bit.ly/35iE9Mx>.

**DATA ADJUSTMENTS:** Differences in the total number of cases and/or deaths and respective % increases reflect the following adjustment(s):

**Bahamas:** The Bahamas Ministry of Health retrospectively released data. Cases have been retrospectively adjusted for 7 June 2021 to align with the Bahamas MoH indicating 12,027 cases. Available at: <https://bit.ly/3pOt9zX>

**Ecuador:** The Ecuador Ministry of Public Health released the 8 June data of 432,985 cases including 20,831 deaths after the 3 PM time cut off. The data has been retrospectively added to the 8 June Americas table. Report available at: <https://bit.ly/3v9c1pw>.
