COVID-19 - Highlights

- 1. As of 29 June, in Chile, a total of 22,471,652 of COVID-19 vaccines have been administered nationally, of which, 360,129 correspond to persons with a single dose (CanSino, single dose, recently introduced), 12,131,374 are persons with a first dose and 10,340,278 are persons who completed their vaccination schedule (which include single dose). Overall, 82.18% of the population has received at least the first dose. The full report is available in Spanish at: https://bit.ly/3qyblE5.
- 2. On 29 June, the **Brazil** Ministry of Health (MoH) has temporarily suspended the contract to purchase the Covid-19 vaccine from Covaxin. The report is available in Portuguese at: https://bit.ly/2TaNZO1.
- 3. On 28 June 2021, the **Barbados** Ministry of Health (MoH) published a Guidance On Allergic Reactions to COVID-19 Vaccine intended for healthcare providers. The full report is available at: https://bit.ly/3dr9IrP.

Staring the weekend of 26 June 2021, the PAHO COVID-19 daily situation reports will no longer be published on Saturdays and Sundays. The reports will continue to be published during the workweek – Monday through Friday – at the regularly scheduled time, with the exception of any official holidays observed by PAHO in Washington, DC

Spotlight - Haiti - PAHO/WHO Country Office Situation Report #56

Current Situation: Since the start of the pandemic up to 25 June, there have been 18,562 cases of COVID-19 of which 12,842 have recovered and 425 deaths have reported. Figure 1 illustrates that the number of confirmed COVID-19 continues to increase nationally and has also associated with a surge in COVIDrelated hospitalizations and deaths. An increase of 12.4% was observed from epidemiological week (EW) 24, in comparison to EW 23 (887 cases in EW 23 compared to 997 in

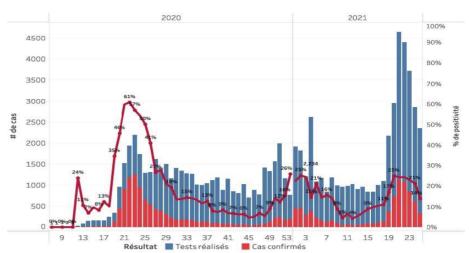

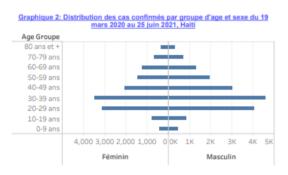

Figure 1: Number of COVID-19 tests and confirmed cases by epidemiological week of report. Haiti. EW 8

EW 24). Furthermore, an additional 35 deaths during EW 24 were reported. Additionally, a peak of confirmed cases can be observed from EW 17 of 2021 up to EW 21 of the same year, however, while testing surpassed both peaks previously observed, the number of confirmed cases did not surpass the peak observed between

Graphique 3: Distribution des décès par groupe d'age et sexe

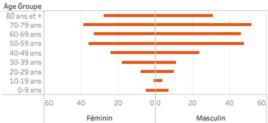

Figure 2: Distribution of Cases and Deaths by Agegroup – 19 March 2020 – 25 June 2021.

EW 20 to EW 21 of 2020. Among the confirmed cases, 45.6% correspond to females.

Deaths: Between 15 April and 28 June 2021, an increasing trend hospitalization can be observed, and as of 24 June, a total of 425 deaths have been reported (CFR 2%) and as of 25 June 16.2% (3,008) of the cases required hospitalization. Among all the confirmed cases, the age group that has been most affected are those in the 30-39 age group 26.7% (4,953 cases), followed by those in the 20-29 age group 18.2% (3,382). Overall, 76% of all COVID-19 cases are among persons between 20 and 59 years old. Furthermore, among all the deaths reported as of 25 June, 73.6% (313) correspond to persons between 50 years and older

(Figure 2).

Hospitalization: As of 25 June 2021, the national occupancy rate of hospital beds in the country remains low,

rate

however in the department of Centre, occupancy is at 51% leaving only 31 available COVID-19 beds (**Figure 3**). In Port au Prince, Bon Repos Hospital has not been able to start operations due to the lack of oxygen in the facility.

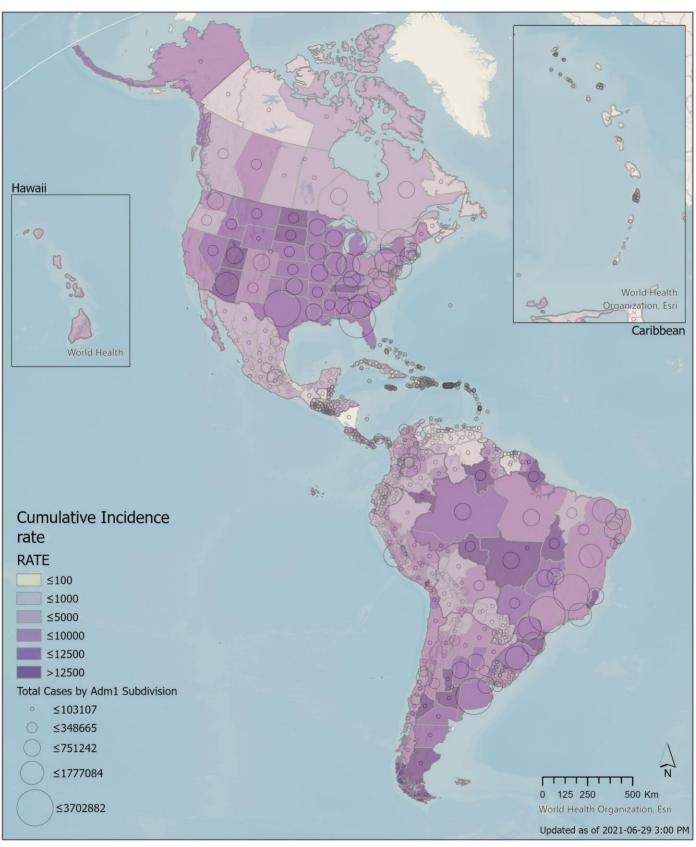

Laboratory and Vaccination: As of 25 June, a total of 89,188 tests have

Figure 3: COVID-19 Occupancy per Department

been performed nationally since the beginning of the pandemic. PCR testing in the Gran Sud is hampered by a shortage of GeneXpert cartridges at the national level, and by the impossibility to send collected samples to the National Laboratory of Public Health in Port-au-Prince due to the ongoing security situation in the Martissant area The Ministry of Public Health and Population (MSPP) of Haiti has transmitted to GAVI all the regulatory documents to facilitate the arrival of the 129,600 doses of AstraZeneca-AB. Vaccination is previewed to start between the end of July and the beginning of August 2021.

Map 1. Reported number of cumulative COVID-19 cases in the Region of the Americas and corresponding incidence rate (per 100,000 population) by country/territory. As of 29 June 2021.

Table notes on the next page

NOTES: Case and death counts may include both confirmed and probable classifications depending on the reporting Member State.

- Antibody tests, including rapid diagnostic tests (RDTs) based on antibody detection, are not recommended for use by PAHO/WHO in clinical diagnosis. Antigen-detecting RDTs may be used following the WHO 11 September 2020 Guidance, available at: https://bit.ly/2FxK2fs.
- Data is updated on a weekly basis for Guadeloupe, Martinique, Nicaragua, Saint Barthelemy, Saint Martin, and Saint Pierre
 and Miquelon.
- As of 11 November 2020, the previously aggregated Bonaire, Saba and Sint Eustatius are now being presented separately in the table.
- *A dispute exists between the Governments of Argentina and the United Kingdom of Great Britain and Northern Ireland concerning sovereignty over the Falkland Islands (the) (Malvinas)

Argentina: On 14 March 2021, due to daylight savings time observed in Eastern Standard Time zone, the Argentina data is no longer published by 3:00PM EST same day and is henceforth included in the following day table. Between 22 February and 14 March 2021, the data had corresponded to the same date.

Bahamas: According to the latest Bahamas Ministry of Health (MoH) publication, there are a total of 29 additional deaths under investigation, available at: https://bit.ly/3wh84Aq,

Ecuador: According to a 6 September Ecuador Ministry of Public Health press release, only cases confirmed by RT-PCR will be reported; previously, cases who tested positive by either RT-PCR or RDTs were reported, resulting in the exclusion of 8,956 cases. Available at: https://bit.ly/3h2EWEA,,,,

El Salvador: Cumulative cases and deaths as published by the Government of El Salvador: https://covid19.gob.sv/. The government presents a retroactively adjusted epidemiological curve of daily cases on the same dashboard.

Guadeloupe: Deaths are aggregated for Guadeloupe, Saint Martin and Saint Barthelemy in Santé Publique France weekly publications; death counts for Guadeloupe are calculated subtracting deaths in Saint Martin and Saint Barthelemy. Available at: https://bit.lv/39UMysd

Jamaica: According to the latest Jamaica Ministry of Health and Wellness press release, there are a total of 120 additional deaths under investigation, available at: https://bit.ly/3qAwlJo

Mexico: On 1 June 2021, the Mexico Ministry of Health reported 4,272 deaths in 24 hours. Of these, 3,924 were reported in 2020 and the remaining were reported in 2021. Available at: https://bit.ly/3pfdMA8

Nicaragua: Please note there are discrepancies with the data published by the Citizen's Observatory COVID-19 Nicaragua as of 26 June 2021. Available at: https://bit.ly/3pw7ZVR

Peru: Aggregated case total as reported by the Peru MoH; latest disaggregated data available is 606,562 by RT-PCR + 497,418 by antigen tests + 929,626 by other RDTs. Antibody tests, including RDTs based on antibody detection, are not recommended for use by PAHO/WHO in clinical diagnosis. Antigen-detecting RDTs may be used following the WHO 11 September 2020 Guidance, available at: https://bit.ly/3fJVKTM. On 31 May 2021, the Government of Peru announced that, after revision, the death toll was 180,764 deaths as of 22 May 2021, available at: https://bit.ly/3fYGj8V. The number of cumulative deaths reported prior to the revision, on 30 May, was 69,342, available at: https://bit.ly/3pkar2U.

Puerto Rico: Aggregated case total as reported by the Puerto Rico Department of Health (DoH); 122,969 were positive by RT-PCR and 17,052 were positive by antigen tests; previously, cases who tested positive by either RT-PCR or serological RDTs were reported, resulting in the exclusion of 33,965 cases. Available at: https://bit.ly/2VviksQ

United States of America: Case and death counts include both confirmed and probable classifications, as published on the U.S. Centers for Disease Control and Prevention (US CDC) website on 29-June. Excludes American Samoa, Federated States of Micronesia, Guam, Commonwealth of the Northern Marianas, Puerto Rico, Palau, Republic of Marshall Islands and the United States Virgin Islands. Case and death counts may differ from other US CDC data sources because these are provisional counts which are subject to change, including updates to data reported previously, adjustments can occur. Sources: https://bit.ly/2RSpap5 and https://bit.ly/2RVl2n6.

Uruguay: According to the latest Uruguay Ministry of Public Health report, the total notes 27 positive cases reported in the last 24 hours were excluded from the total. Available at: https://bit.ly/3Ab9RJF.

DATA ADJUSTMENTS: Differences in the total number of cases and/or deaths and respective % increases reflect the following adjustment(s):

Bahamas: Cases and deaths were retrospectively adjusted for 28 June 2021, to align with the Bahamas MoH data for 27 June 2021 indicating 12,586 cases, including 246 deaths. Available at: https://bit.ly/365nL1W

Guatemala: Cases and deaths were retrospectively adjusted for 28 June 2021, to align with the Guatemala MoH data for 28 June 2021 indicating 291,977 cases, including 9,089 deaths. Available at: https://bit.ly/2UeIILL

Haiti: Cases and deaths were retrospectively adjusted for 28 June 2021, to align with the Haiti MoH data for 25 June 2021 indicating 18,562 cases, including 425 deaths. Available at: https://bit.ly/3w4F2Dk
