COVID-19 - Highlights

- On 27 July, the Chile Ministry of Health (MoH) reported a total 753 new cases in the last 24 hours, the lowest figure since April 2020, with a positivity rate of 2.17% at the national level. The report is available in Spanish at: https://bit.ly/2WtzNko.
- 2. In Canada as of 26 July, a total of 32,975 confirmed positive cases of COVID-19 have been reported in indigenous communities since the beginning of the pandemic, of which 32,271 have recovered and 379 are deaths. Additionally, as of 20 July a total of 674,189 doses have been administered of which 281,188 were second doses administered in persons aged 12 and older The full report is available at: https://bit.ly/2Qtcswp and https://bit.ly/2QsbbWz.
- 3. As of 26 July, in **Haiti**, a total of 3,369 persons have been vaccinated, of which 3,028 received the first dose of Moderna, and 341 received the Janssen vaccine. The full report is available in French at: https://bit.ly/3i8h7z6.

Starting the weekend of 26 June 2021, the PAHO COVID-19 daily situation reports will no longer be published on Saturdays and Sundays. The reports will continue to be published during the workweek – Monday through Friday – at the regularly scheduled time, with the exception of any official holidays observed by PAHO in Washington, DC

SPOTLIGHT - COVID-19 in Guatemala - Ministry of Health Dashboard

Figure 1A: Data Guatemala Ministry of Health. Dashboard

Current situation: From 13 February 2020 to 26 July 2021, a total of 355,223 cases of COVID-19, of which 33,219 are active cases, 10,176 deaths were reported in Guatemala, for a cumulative incidence rate of 2,107.1 cases per 100,000 population and a cumulative mortality rate of 57.3 cases per 100,000 inhabitants with a case fatality rate of 2.8%.

As of 26 July, the Departments reporting the highest cumulative incidence rate

are Guatemala Department (4,860.1 cases per 100,000 population and a cumulative mortality rate of 128.1 cases per 100,000 population); followed by Sacatepequez and Quetzaltenango

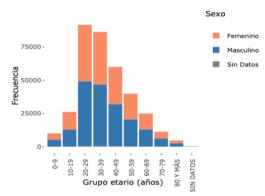

Figure 1B: Confirmed cases by age group

Departments with 2,991.9 and 2,672.2 cases per 100,000 population and a cumulative mortality rate of 99.5 and 82.4 cases per 100,000 population respectively. Among all the confirm cases, 52% (185,850 cases) correspond to males (**Figure 1A**) and 68.8% of the cases are between ages 20-49 years of age (**Figure 1B**).

Deaths: Figure 2 shows the correlation of confirmed cases reported in

the country to the number of deaths reported between 13 March 2020 and 26 July 2021. Since the beginning of the pandemic and as of 7 June, a total of 10,176 deaths have been reported in Guatemala, of which 68% (6,934 deaths) correspond to males; most of the deaths reported are concentrated in the 60–69-year-old group (27.2%) and 66% of all deaths reported are between ages 50-79 years old. An increasing trend can be observed between epidemiological week (EW) 21 and EW 30, surpassing the peaks observed in 2020 and 2021, however, the number of reported deaths during the same period has not exceeded the number of deaths reported in EW 28 of 2020.

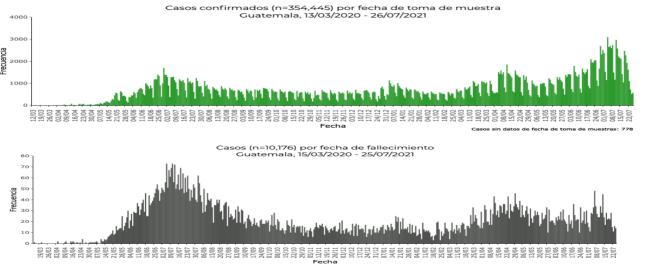

Figure 2: Confirmed cases and Confirmed deaths from 13 March 2020 to 6 June 2021

Vaccination: As of 26 July 2021, a total of 1,798,598 doses of the COVID-19 vaccine have been administered nationally

covering a total of 1,489,259 persons with the first dose and 309,339 have completed the vaccination schedule (FIGURE 3). Among the total vaccinated persons, 55% are female, 47% have received the AztraZeneca vaccine, 25% the Sputnik vaccine and 28% has received the Moderna vaccine.

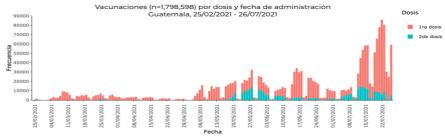

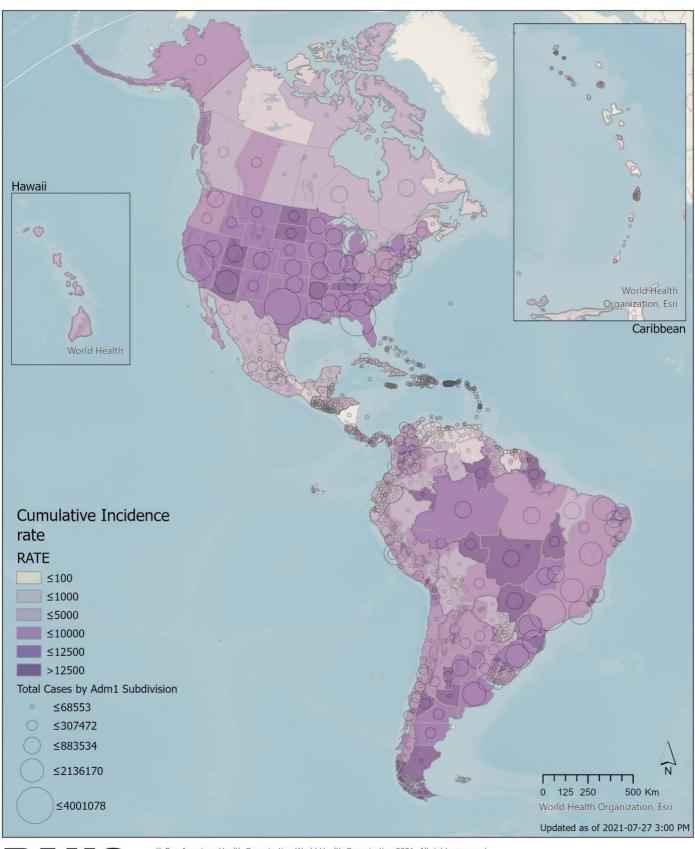

Figure 3: Vaccination by doses and date of administration 25 Feb-7 June 2021

Map 1. Reported number of cumulative COVID-19 cases in the Region of the Americas and corresponding incidence rate (per 100,000 population) by country/territory. As of 27 July 2021.

Table notes on the next page

NOTES: Case and death counts may include both confirmed and probable classifications depending on the reporting Member State.

- Antibody tests, including rapid diagnostic tests (RDTs) based on antibody detection, are not recommended for use by PAHO/WHO in clinical diagnosis. Antigen-detecting RDTs may be used following the WHO 11 September 2020 Guidance, available at: https://bit.lv/2FxK2fs.
- Data is updated on a weekly basis for Guadeloupe, Martinique, Nicaragua, Saint Barthelemy, Saint Martin, and Saint Pierre
 and Miquelon.
- As of 11 November 2020, the previously aggregated Bonaire, Saba and Sint Eustatius are now being presented separately in the table.
- *A dispute exists between the Governments of Argentina and the United Kingdom of Great Britain and Northern Ireland concerning sovereignty over the Falkland Islands (the) (Malvinas)

Argentina: On 14 March 2021, due to daylight savings time observed in Eastern Standard Time zone, the Argentina data is no longer published by 3:00PM EST same day and is henceforth included in the following day table. Between 22 February and 14 March 2021, the data had corresponded to the same date.

Bahamas: According to the latest Bahamas Ministry of Health (MoH) publication, there are a total of 26 additional deaths under investigation, available at: https://bit.ly/3wh84Aq,

Ecuador: According to a 6 September Ecuador Ministry of Public Health press release, only cases confirmed by RT-PCR will be reported; previously, cases who tested positive by either RT-PCR or RDTs were reported, resulting in the exclusion of 8,956 cases. Available at: https://bit.ly/3h2EWEA

El Salvador: Cumulative cases and deaths as published by the Government of El Salvador: https://covid19.gob.sv/. The government presents a retroactively adjusted epidemiological curve of daily cases on the same dashboard.

Guadeloupe: Deaths are aggregated for Guadeloupe, Saint Martin and Saint Barthelemy in Santè Publique France weekly publications; death counts for Guadeloupe are calculated subtracting deaths in Saint Martin and Saint Barthelemy. Available at: https://bit.ly/39UMysd

Jamaica: According to the latest Jamaica Ministry of Health and Wellness press release, there are a total of 103 additional deaths under investigation, available at: https://bit.ly/3aAwlJo

Mexico: On 1 June 2021, the Mexico Ministry of Health reported 4,272 deaths in 24 hours. Of these, 3,924 were reported in 2020 and the remaining were reported in 2021. Available at: https://bit.ly/3pfdMA8

Nicaragua: Please note there are discrepancies with the data published by the Citizen's Observatory COVID-19 Nicaragua as of 23 July 2021. Available at: https://bit.lv/3pw7ZVR

Peru: Aggregated case total as reported by the Peru MoH; latest disaggregated data available is 622,550 by RT-PCR + 543,739 by antigen tests + 938,716 by other RDTs. Antibody tests, including RDTs based on antibody detection, are not recommended for use by PAHO/WHO in clinical diagnosis. Antigen-detecting RDTs may be used following the WHO 11 September 2020 Guidance, available at: https://bit.ly/3fJVKTM. On 31 May 2021, the Government of Peru announced that, after revision, the death toll was 180,764 deaths as of 22 May 2021, available at: https://bit.ly/3fYGj8V. The number of cumulative deaths reported prior to the revision, on 30 May, was 69,342, available at: https://bit.ly/3pkar2U.

Puerto Rico: Aggregated case total as reported by the Puerto Rico Department of Health (DoH); 125,614 were positive by RT-PCR and 18,707 were positive by antigen tests; previously, cases who tested positive by either RT-PCR or serological RDTs were reported, resulting in the exclusion of 33,965 cases. Available at: https://bit.ly/3AXY7KU

United States of America: Case and death counts include both confirmed and probable classifications, as published on the U.S. Centers for Disease Control and Prevention (US CDC) website on 27-July. Excludes American Samoa, Federated States of Micronesia, Guam, Commonwealth of the Northern Marianas, Puerto Rico, Palau, Republic of Marshall Islands and the United States Virgin Islands. Case and death counts may differ from other US CDC data sources because these are provisional counts which are subject to change, including updates to data reported previously, adjustments can occur. Data may need to be adjusted for 26 July 2021. Sources: https://bit.lv/2RSpap5 and https://bit.lv/2RVI2n6.

Uruguay: According to the latest Uruguay Ministry of Public Health report, the total notes 11 positive cases reported in the last 24 hours were excluded from the total. Available at: https://bit.ly/3BKIlhn.

DATA ADJUSTMENTS: Differences in the total number of cases and/or deaths and respective % increases reflect the following adjustment(s):

Costa Rica: Cases and deaths were retrospectively adjusted for 25-26 July 2021 to align with the Costa Rica Ministry of Health data from 24-25 July indicating 399,751 and 400,574 cases including 4,949 and 4,966 deaths, respectively. Available at: https://bit.ly/3f3TuFJ and <a href

Ecuador: Cases were retrospectively adjusted for 26 July 2021 to align with the Ecuador Ministry of Health indicating 482,947 cases including 31,426 deaths. Available at: https://bit.ly/3f3aYLk

Haiti: Cases and deaths were retrospectively adjusted for 24 July 2021 to align with the Haiti Ministry of Health data for 21 July 2021 indicating 20,000 cases including 537 deaths. Available at: https://bit.ly/3zEBJos
