Costa Rica	1,020

Deaths (≥ 100)

Brazil	389
United States	387
Argentina	273
Mexico	245
Colombia	218

COVID-19 – Highlights

1. Following the identification of a cluster of COVID-19 cases in **Dominica**, a curfew order will be in effect from 6 p.m. to 5 a.m. starting Tuesday 3 August 2021. Additionally, all non-essential businesses will remain closed and social gatherings are prohibited. The full report is available [here](#).

2. Some of the **Netherlands Overseas Territories** are experiencing a **surge in COVID-19 cases**, these increases are particularly observed in Aruba and Curacao. On 3 August 2021, the Aruba Government announced the implementation of additional requirements for incoming travelers arriving from Bonaire and Curacao, as these territories have a high number of active cases per capita. The full report is available [here](#).

Starting the weekend of 26 June 2021, the PAHO COVID-19 daily situation reports will no longer be published on Saturdays and Sundays. The reports will continue to be published during the workweek – Monday through Friday – at the regularly scheduled time, with the exception of any official holidays observed by PAHO in Washington, DC

Figure 1. Distribution of COVID-19 cases and deaths by epidemiological week (EW) of report, Canada as of EW 30, 2021

TRENDS IN CASES & DEATHS: Following a steady declining trend in cases since epidemiological week (EW) 16, the number of weekly cases is now increasing in Canada. Weekly cases increased by 27% during EW 29 (18-24 July 2021) compared to EW 28 (11-17 July 2021), additionally, in the same period, the average number of daily cases increased by 27% resulting in 501 cases per day. Cases continued increasing during EW 30. Related to deaths, while deaths were overall decreasing, the trend is no longer decelerating as a slight increase was observed between EW 29 and EW 30.

Source: Data published by the Public Health Agency of Canada. Reproduced by PAHO/WHO.

GEOGRAPHICAL DISTRIBUTION: During EW 29, the following provinces and territories reported increases in cases compared to the previous week: British Columbia (77%), Alberta (107%), Saskatchewan (65%), Quebec (30%), Nova Scotia (200%), and Yukon (20%). Ontario and Quebec account for 50% of new cases during EW 29.

DEMOGRAPHIC DISTRIBUTION: During EW 29, cases ranged from less than one year to 98 years of age. The median age during EW 29 (31 years old) decreased compared to the previous week (33 years old) (Table 1). Indeed, 69% of cases reported during the same week were below 40 years old. The highest proportions of new cases were reported among individuals aged 20-29 years old (25.2%) and 0-19 years old (24.8%), while the highest age-specific incidence rate was among those aged 20-29 years old (12.1 cases per 100,000 population).

Table 1. Age, gender distribution, and rate of COVID-19 cases reported to the Public Health Agency of Canada, during EW 29 (18-24 July 2021)

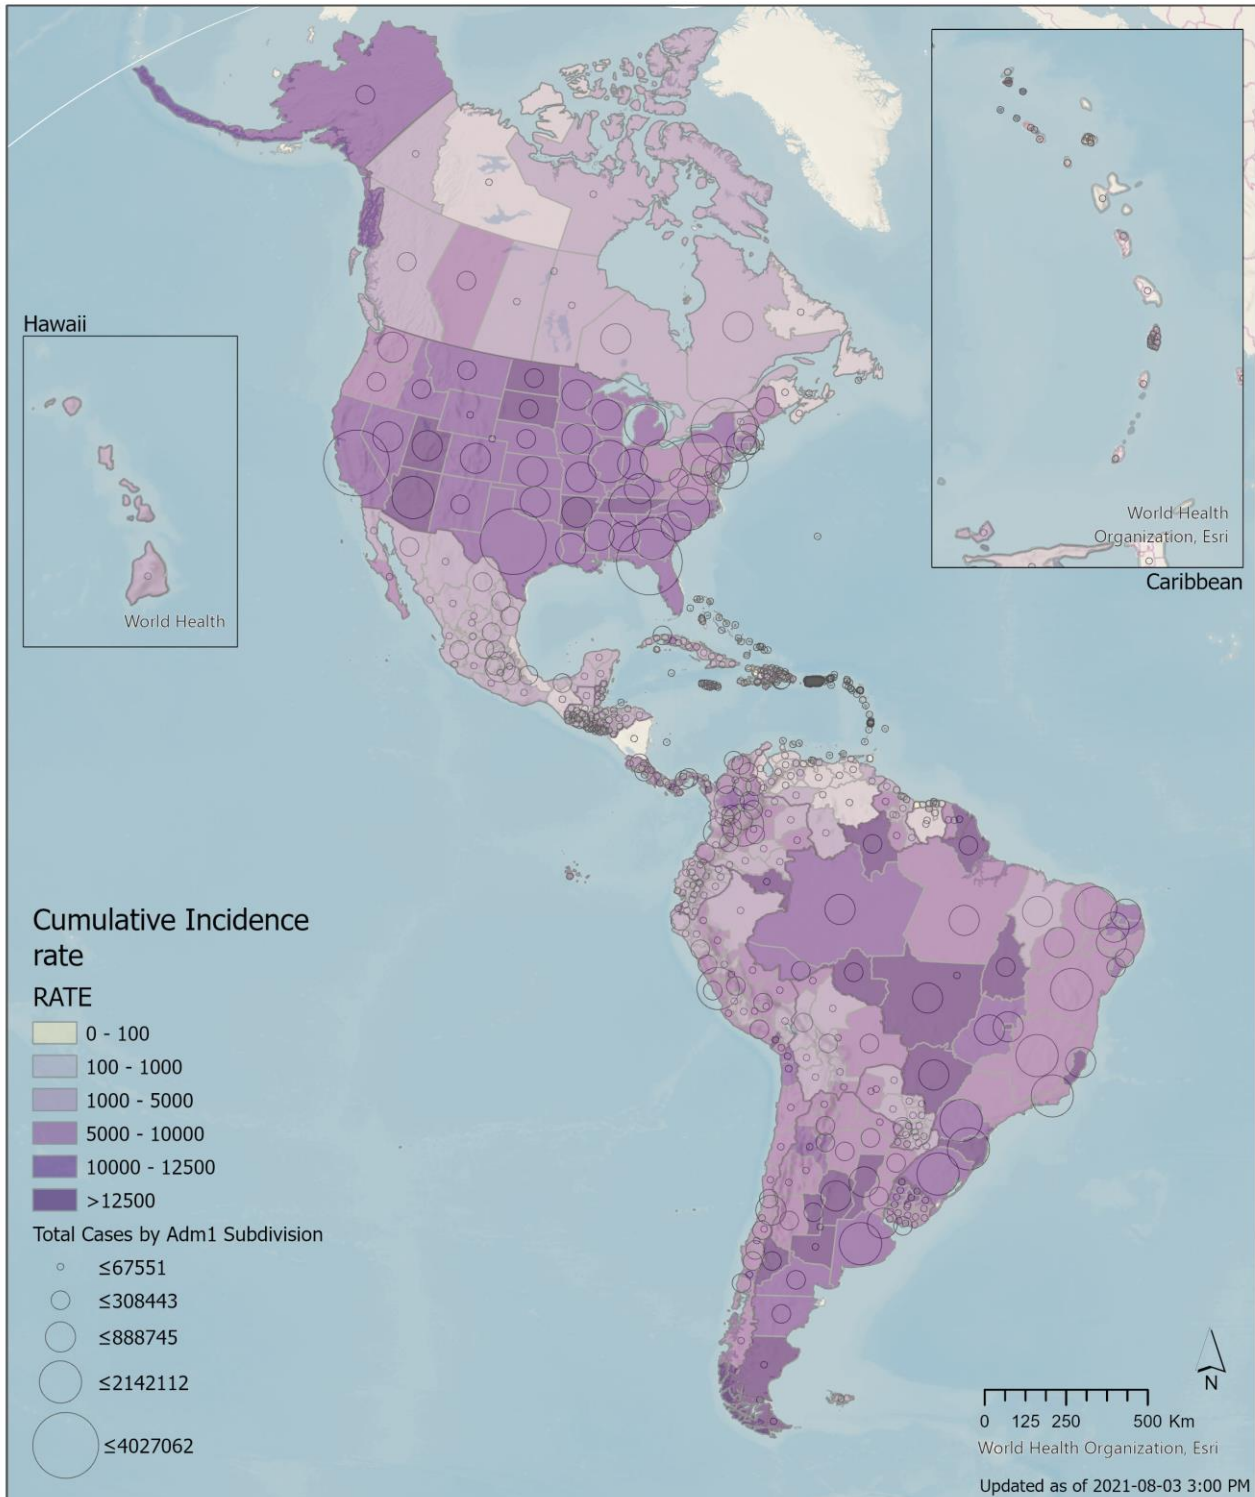

Age groups	Female			Male			Total ^a		
	n	%	Rate	n	%	Rate	n	%	Rate
≤ 19	305	25.9	7.7	305	23.8	7.3	610	24.8	7.5
20-29	294	25.0	11.9	324	25.3	12.2	618	25.2	12.1
30-39	210	17.9	8.0	263	20.6	9.9	473	19.3	8.9
40-49	165	14.0	6.7	142	11.1	5.9	307	12.5	6.3
50-59	90	7.7	3.5	119	9.3	4.6	209	8.5	4.0
60-69	56	4.8	2.3	75	5.9	3.3	131	5.3	2.8
70-79	32	2.7	2.0	33	2.6	2.3	65	2.6	2.8
80+	24	2.0	2.3	18	1.4	2.5	42	1.7	2.4
Total	1 176	100.0	5.6	1 279	100.0	6.0	2 455	100.0	5.8

TESTING: A total of 38,466,868 tests have been performed in Canada since the onset of the pandemic. During EW 29, the country conducted 134.4 tests per 100,000 population resulting in 1.1% positivity; this represents an increase in percent positivity compared to the previous week.

Legend

Table notes on the next page

NOTES: Case and death counts may include both confirmed and probable classifications depending on the reporting Member State.

- Antibody tests, including rapid diagnostic tests (RDTs) based on antibody detection, are not recommended for use by PAHO/WHO in clinical diagnosis. Antigen-detecting RDTs may be used following the WHO 11 September 2020 Guidance, available at: <https://bit.ly/2FxK2fs>
- Data is updated on a weekly basis for Guadeloupe, Martinique, Nicaragua, Saint Barthelemy, Saint Martin, and Saint Pierre and Miquelon.
- As of 11 November 2020, the previously aggregated Bonaire, Saba and Sint Eustatius are now being presented separately in the table.
- *A dispute exists between the Governments of Argentina and the United Kingdom of Great Britain and Northern Ireland concerning sovereignty over the Falkland Islands (the) (Malvinas)

Argentina: On 14 March 2021, due to daylight savings time observed in Eastern Standard Time zone, the Argentina data is no longer published by 3:00PM EST same day and is henceforth included in the following day table. Between 22 February and 14 March 2021, the data had corresponded to the same date.

Bahamas: According to the latest Bahamas Ministry of Health (MoH) publication, there are a total of 30 additional deaths under investigation, available at: <https://bit.ly/3wh84Aq>

Ecuador: According to a 6 September Ecuador Ministry of Public Health press release, only cases confirmed by RT-PCR will be reported; previously, cases who tested positive by either RT-PCR or RDTs were reported, resulting in the exclusion of 8,956 cases. Available at: <https://bit.ly/3h2EWEA>

El Salvador: Cumulative cases and deaths as published by the Government of El Salvador: <https://covid19.gob.sv/>. The government presents a retroactively adjusted epidemiological curve of daily cases on the same dashboard.

Guadeloupe: Deaths are aggregated for Guadeloupe, Saint Martin and Saint Barthelemy in Santé Publique France weekly publications; death counts for Guadeloupe are calculated subtracting deaths in Saint Martin and Saint Barthelemy. Available at: <https://bit.ly/39UMysd>

Jamaica: According to the latest Jamaica Ministry of Health and Wellness press release, there are a total of 106 additional deaths under investigation, available at: <https://bit.ly/3qAwIJo>

Mexico: On 1 June 2021, the Mexico Ministry of Health reported 4,272 deaths in 24 hours. Of these, 3,924 were reported in 2020 and the remaining were reported in 2021. Available at: <https://bit.ly/3pfdMA8>

Nicaragua: Please note there are discrepancies with the data published by the Citizen's Observatory COVID-19 Nicaragua as of 28 July 2021. Available at: <https://bit.ly/3pw7ZVR>

Peru: Aggregated case total as reported by the Peru MoH; latest disaggregated data available is 626,248 by RT-PCR + 548,499 by antigen tests + 939,698 by other RDTs. Antibody tests, including RDTs based on antibody detection, are not recommended for use by PAHO/WHO in clinical diagnosis. Antigen-detecting RDTs may be used following the WHO 11 September 2020 Guidance, available at: <https://bit.ly/3fjVKTM>. On 31 May 2021, the Government of Peru announced that, after revision, the death toll was 180,764 deaths as of 22 May 2021, available at: <https://bit.ly/3fyGj8V>. The number of cumulative deaths reported prior to the revision, on 30 May, was 69,342, available at: <https://bit.ly/3pkar2U>.

Puerto Rico: Aggregated case total as reported by the Puerto Rico Department of Health (DoH); 127,545 were positive by RT-PCR and 20,275 were positive by antigen tests; previously, cases who tested positive by either RT-PCR or serological RDTs were reported, resulting in the exclusion of 33,965 cases. Available at: <https://bit.ly/3AXY7KU>

United States of America: Case and death counts include both confirmed and probable classifications, as published on the U.S. Centers for Disease Control and Prevention (US CDC) website on 3-August. Excludes American Samoa, Federated States of Micronesia, Guam, Commonwealth of the Northern Marianas, Puerto Rico, Palau, Republic of Marshall Islands and the

United States Virgin Islands. Case and death counts may differ from other US CDC data sources because these are provisional counts which are subject to change, including updates to data reported previously, adjustments can occur. Sources: <https://bit.ly/2RSpap5> and <https://bit.ly/2RVI2n6>.

Uruguay: According to the latest Uruguay Ministry of Public Health report, the total notes 14 positive cases reported in the last 24 hours were excluded from the total. Available at: <https://bit.ly/3lqVIZj>.

DATA ADJUSTMENTS: Differences in the total number of cases and/or deaths and respective % increases reflect the following adjustment(s):

Bahamas: Cases and deaths were retrospectively adjusted for 30-31 July and 1 August 2021 to align with the Bahamas Ministry of Health indicating 14,677, 14,840 and 14,920 cases including 286, 287 and 291 deaths, respectively. Available at: <https://bit.ly/3CajVU9>, <https://bit.ly/3rP56I6> and <https://bit.ly/37iX2zG>.

Bermuda: Cases were retrospectively adjusted for 31 July 2021 to align with the Bermuda Ministry of Health indicating 2,568 cases.

Costa Rica: Cases and and deaths were retrospectively adjusted for 1-2 August 2021 to align with the Costa Rica Ministry of Health indicating 408,200 and 409,160 cases including 5,042 and 5,048 deaths, respectively. Available at: <https://bit.ly/3jjFR6H> and <https://bit.ly/2ViSkQ9>.

Ecuador: Cases and deaths were retrospectively adjusted for 2 August 2021 to align with the Ecuador Ministry of Health indicating 487,702 cases including 31,644 deaths. Available at: <https://bit.ly/3zYFW6C>

Martinique: Cases and deaths were retrospectively adjusted for 2 August 2021 to align with the Martinique Prefecture indicating 20,342 cases including 143 deaths. Available at: <https://bit.ly/2WLZzQR>

Saint Vincent and the Grenadines: Cases were retrospectively adjusted for 31 July and 1 August 2021 to align with the Saint Vincent and the Grenadines Ministry of health indicating 2,296 and 2,297 cases, respectively. Available at: <https://bit.ly/3yojpij> and <https://bit.ly/3A6HX0G>.

United States: The US CDC released additional data after the 3pm cut off on 2 August 2021. Cases and deaths were retrospectively adjusted for 2 August 2021 to align with the US CDC indicating 34,931,685 cases including 608,635 deaths.
