### COVID-19 – Highlights

Today's maps represent the mortality per from COVID-19 per 1 million population in the Region of the Americas reported in EW 52 (2021) and EW 01 (2022). The highest mortality rates in the region are observed in the US, Bonaire, Puerto Rico, Jamaica, Dominica, and Trinidad and Tobago.

In **North America**, most US states reported a mortality rate >50 per million, and some states continue to report a mortality rate >100 per million population (Arizona, New Mexico, Michigan, Indiana, Ohio, Pennsylvania, New Hampshire, and Maine). In Canada, we observe an increase in mortality rates in most provinces compared to the previous two weeks, with Alberta, Saskatchewan and Ontario reporting between 10-25 deaths per million population, and Quebec, Manitoba, and Yukon reporting between 25-50 deaths per million population.

In **Central America**, we observe an increase in deaths relative to the last 2 weeks in Belize (highest incidence in Stann Creek, Toledo and Cayo districts, with over 50 deaths per million people) and in Costa Rica (highest incidence in Limon province, between 10-25 cases per million people). In **South America** we observe an increase in mortality in Chile as well as in some of Colombia's departments (Amazonas and Valle del Cauca), compared to the previous two weeks. Increases were also observed in Brazil (Para, Mato Grosso, Rondonia, and Tocantins). Territories reporting highest rates in the sub-region (between 25-50 deaths) include Bolivia, some departments of Peru, Colombia, Chile and the state of Rondonia in Brazil.
