COVID-19 - Highlights

Today's maps represent the mortality per from COVID-19 per 1 million population in the Region of the Americas reported between EW 01 and EW 03, 2022. The highest mortality rates in the region are observed in the US, Uruguay, Puerto Rico, the U.S. Virgin Islands, and Trinidad and Tobago, Curacao, as well as Bonaire, Saba, and Sint Eustatius.

In North America, most US states reported a mortality rate >50 deaths per million people, and several states continue to report a mortality rate >100 deaths per million people especially in the Midwest and Northeast regions. In Canada, we observe an increase in mortality rates in Manitoba compared to the previous two weeks, the province now reporting highest rates in the country along with the province of Quebec (between 50 and 100 deaths per million people). In Mexico, the northern states of Baja California, Baja California Sur, Sonora, Chihuahua and Coahuila reported between 50-100 deaths per million people.

In **South America** we observe an increase in mortality in the sub-region. Highest mortality rates over the past two weeks (over 100 deaths per million people) were observed in Uruguay's Treinta y Tres' department. Second highest rates (between 50-100 deaths per million people) were observed in Bolivia, Suriname, Guyana, French Guiana as well as in some of Peru, Colombia, and Paraguay's departments

In the **Caribbean**, an increase in mortality was observed in Cuba, Dominican Republic, Haiti, The Bahamas, Saint Vincent and the Grenadines, Barbados, Curacao, and Aruba. In the Guianese shield, increases in mortality were observed in Guyana, Suriname, French Guiana, now reporting between 50-100 cases per million people.

Region of the Americas

131,342,970 cases

2,483,977 deaths

56 countries/areas/territories affected.

Global

357,940,838 cases

5,615,573 deaths

236

countries/areas/territories affected.

Total cases, deaths & CFR (%) among PAHO countries/territories with ≥ 300,000 cumulative cases.

Table notes on the next page.

NOTES: Case and death counts may include both confirmed and probable classifications depending on the reporting Member State.

- Antibody tests, including rapid diagnostic tests (RDTs) based on antibody detection, are not recommended for use by PAHO/WHO in clinical diagnosis. Antigen-detecting RDTs may be used following the WHO 6 October 2021 Guidance, available at: https://bit.ly/3EK44fn.
- Data is updated on a weekly basis for the British Virgin Islands, Guadeloupe, Martinique, Nicaragua, Saint Barthelemy, Saint Martin, and Saint Pierre and Miquelon.
- As of 26 January 2020, the previously aggregated Bonaire, Saba and Sint Eustatius are now being presented separately
 in the table.
- *A dispute exists between the Governments of Argentina and the United Kingdom of Great Britain and Northern Ireland concerning sovereignty over the Falkland Islands (the) (Malvinas)

Argentina: On 14 March 2021, due to daylight savings time observed in Eastern Standard Time zone, the Argentina data is no longer published by 3:00PM EST same day and is henceforth included in the following day table. Between 22 February and 14 March 2021, the data had corresponded to the same date.

Bahamas: According to the latest Bahamas Ministry of Health (MoH) publication, there are a total of 42 additional deaths under investigation, available at: https://bit.ly/3wh84Aq,

Ecuador: According to a 6 September Ecuador Ministry of Public Health press release, only cases confirmed by RT-PCR will be reported; previously, cases who tested positive by either RT-PCR or RDTs were reported, resulting in the exclusion of 8,956 cases. Available at: https://bit.ly/3h2EWEA,,,

El Salvador: Cumulative cases and deaths as published by the Government of El Salvador: https://covid19.gob.sv/. The government presents a retroactively adjusted epidemiological curve of daily cases on the same dashboard.

Saint Vincent and the Grenadines: Aggregated case total as reported by The Saint Vincent and Grenadines Ministry of Health, Wellness and the Environment; In light of recent information that the MoH now considers antigen positive cases as COVID-19 cases, data has been revised to reflect the total COVID-19 cases diagnosed by both tests since 24 September 2021. To date, 6,663 were positive by RT-PCR and 2,784 were positive by antigen tests. Available at: https://bit.ly/3fW1hFF

Jamaica: According to the latest Jamaica Ministry of Health and Wellness press release, there are a total of 385 additional deaths under investigation, available at: https://bit.ly/3qAwlJo

Mexico: On 1 June 2021, the Mexico Ministry of Health reported 4,272 deaths in 24 hours. Of these, 3,924 were reported in 2020 and the remaining were reported in 2021. Available at: https://bit.ly/3pfdMA8

Nicaragua: Please note there are discrepancies with the data published by the Citizen's Observatory COVID-19 Nicaragua as of 15 December 2021. Available at: https://bit.ly/3pw7ZVR

Peru: Aggregated case total as reported by the Peru MoH; latest disaggregated data available is 882,590 by RT-PCR + 993,178 by antigen tests + 955,884 by other RDTs. Antibody tests, including RDTs based on antibody detection, are not recommended for use by PAHO/WHO in clinical diagnosis. Antigen-detecting RDTs may be used following the WHO 11 September 2020 Guidance, available at: https://bit.ly/3fJVKTM. On 31 May 2021, the Government of Peru announced that, after revision, the death toll was 180,764 deaths as of 22 May 2021, available at: https://bit.ly/3fYGj8V. The number of cumulative deaths reported prior to the revision, on 30 May, was 69,342, available at: https://bit.ly/3pkar2U.

Puerto Rico: Aggregated case total as reported by the Puerto Rico Department of Health (DoH); 254,785 were positive by RT-PCR and 193,753 were positive by antigen tests; previously, cases who tested positive by either RT-PCR or serological RDTs were reported, resulting in the exclusion of 33,965 cases. Available at: https://bit.ly/3AXY7KU

United States of America: Case and death counts include both confirmed and probable classifications, as published on the U.S. Centers for Disease Control and Prevention (US CDC) website on 26-January. Excludes American Samoa, Federated States of Micronesia, Guam, Commonwealth of the Northern Marianas, Puerto Rico, Palau, Republic of Marshall Islands and the United States Virgin Islands. Case and death counts may differ from other US CDC data sources because these are provisional counts which are subject to change, including updates to data reported previously, adjustments can occur. Sources: https://bit.ly/2RSpap5 and https://bit.ly/2RSpap5 and https://bit.ly/2RSpap5 and https://bit.ly/2RSpap5 and https://bit.ly/2RSpap5 and https://bit.ly/2RSVI2n6.

Uruguay: According to the latest Uruguay Ministry of Public Health report, the total notes 06 positive cases reported in the last 24 hours were excluded from the total. Available at: https://bit.lv/3fZPRkh.
