### COVID-19 – Highlights

Today's maps represent the percent change in hospitalization (left) and ICU occupancy (right) between epidemiological week (EW) 01 and EW 04 of 2022 (January 2022).

On the left, we observe that most countries experienced an increase in hospitalization over the past month. Countries experiencing the largest increase (>100% Increase) are Paraguay and Costa Rica. Countries reporting between 60-100% increase in hospitalization include several Caribbean countries such as Saint Lucia, Antigua and Barbuda, Guadeloupe, Grenada, Saint Vincent and the Grenadines, Aruba, Bermuda, as well as Bonaire, Saba, and Sint Eustatius. In South America, Chile reported also between 60-100% increase in hospitalization.

On the right, we observe percent change in ICU occupancy was similar to the percent change in hospitalization for North and Central American countries for which data was available. The only difference is that increase in ICU occupancy appeared lower than increase in hospitalization in Canada and Costa Rica. In South America, Paraguay also reported highest increase in ICU occupancy (>100% increase), along with Uruguay and Guyana. While reporting an increase in hospitalization in January, Chile reported a decrease in ICU occupancy during the same period (up to 35% decrease). In the Caribbean, Jamaica and Grenada reported over 100% increase in ICU occupancy, which was higher than both countries' reported increase in hospitalization.
