## Tobacco: prices and taxes

## RETAIL PRICE PER PACK OF 20 CIGARETTES

|  |  | In local currency (XCD) | In international dollars (PPP) ${ }^{\mathbf{1}}$ |
| :--- | :--- | :---: | :---: |
| Most popular brand: | Marlboro | 14.10 | 6.88 |
| Most inexpensive brand: | L\&B (Lambert \& Butler) | 8.75 | 4.27 |
| Most expensive brand: | Marlboro | 14.10 | 6.88 |

## TAXES ON TOBACCO²

Taxes as percentage of the final price of the most sold brand

| Taxes as percentage of the final price of the most sold brand |  |  |
| :--- | :--- | ---: |
|  | Specific taxes $^{4}$ | $0.00 \%$ |
| Excise taxes $^{3}$ | Ad valorem tax |  |
| Value-added/sales tax (VAT) |  | $0.00 \%$ |
| Import duty |  |  |
| Other taxes |  | $13.04 \%$ |
| Total excise taxes | $0.00 \%$ |  |

## Design and administration of cigarette taxes

 Are taxes applied in a mixed fashion (ad valorem and specific)?No
If a mixed tax system is used, is the tax burden of specific taxes greater than that of ad valorem taxes? ${ }^{7}$
If an ad valorem or mixed tax system exists, is a specific minimum tax applied? ${ }^{8}$

1 The international dollar is a currency unit adjusted for purchasing power parity (PPP) that is used to compare the value of products and services in different countries.
2 Taxes: taxes imposed on goods or services which cause consumers to pay higher prices.
3 Excise taxes: these have a greater impact on public health since they are applied exclusively to tobacco products and raise their relative price compared to other products and services.
4 Specific tax: it is established in relation to quantity, for example, a set quantity of cigarettes, or by weight.
5 Ad valorem tax: it is based on the value of the product, such as a percentage of the retail price, the manufacturer's price, etc.
6 The effectiveness of import duties in raising sales prices has been declining as countries have signed bilateral, regional, and global trade agreements.
7 Specific excise taxes tend to raise consumer prices more, relatively, than ad valorem taxes. Imposing the same specific excise tax on all cigarettes sends the clear message that they are all equally detrimental.
8 If the tax calculated falls below a specified minimum level, a specific tax rate is applied.

EVOLUTION OF TAXES AND PRICES ON THE MOST POPULAR BRAND OF CIGARETTES

|  | 2008 | 2010 | 2012 | 2014 | 2016 | 2018 | 2020 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Tax (percentage of the final price of the most sold brand) | 14.77\% | 14.77\% | 15.00\% | 14.63\% | 15.47\% | 13.26\% | 13.14\% |
| Price of the most sold brand (international dollars PPP) | 3.86 | 3.80 | 3.55 | 4.18 | 3.88 | 3.83 | 6.88 |

EVOLUTION OF THE PRICE OF CIGARETTES COMPARED TO INCOME

|  | 2010 | 2012 | 2014 | 2016 | 2018 | 2020 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Percentage of per capita GDP required to purchase 100 packs of 20 cigarettes of the most sold brand* | 1.77\% | 1.74\% | 2.12\% | 1.90\% | 1.76\% | 3.69\% |
| Have cigarettes become less affordable since 2010? |  |  |  | No change ${ }^{9}$ |  |  |
| Did cigarettes become less affordable between 2018 and 2020? |  |  |  | Yes |  |  |
| * Note that a higher percentage implies a lower affordability and a greater disincentive to consume cigarettes <br> 9 Affordability is considered unchanged (2010-2020) if the least-squares growth rate is not statistically signif |  |  |  |  |  |  |

## SUPPLEMENTARY INFORMATION ON TAXES

| Are sales of duty (or excise) free cigarettes banned? | No |
| :--- | :--- |
| Are tobacco tax revenues (or part of) earmarked for <br> health purposes? | No |

... Data not reported/not available
--- Data not required/not applicable

## Tobacco: prices and taxes

## RETAIL PRICE PER PACK OF 20 CIGARETTES

|  |  | In local currency (BZD) | In international dollars (PPP) ${ }^{1}$ |
| :--- | :--- | :---: | :---: |
| Most popular brand: | Pall Mall | 5.50 | 4.20 |
| Most inexpensive brand: | Pall Mall | 5.50 | 4.20 |
| Most expensive brand: | Benson \& Hedges, Winston | 11.00 | 8.39 |

## TAXES ON TOBACCO ${ }^{2}$

Taxes as percentage of the final price of the most sold brand

| Excise taxes $^{3}$ | Specific taxes $^{4}$ | $23.64 \%$ |
| :--- | :--- | ---: |
| Value-added/sales tax (VAT) | ${\text { Ad valorem } \text { tax }^{5}}$ ( |  |
| Import duty |  |  |
| Other taxes |  | $11.11 \%$ |
| Total excise taxes |  | $0.00 \%$ |

| Design and administration of cigarette taxes |  |
| :--- | :--- |
| Are taxes applied in a mixed fashion (ad valorem | No |
| and specific)? |  |
| If a mixed tax system is used, is the tax burden of | --- |
| specific taxes greater than that of ad valorem taxes? |  |
| If an ad valorem or mixed tax system exists, is a |  |
| specific minimum tax applied? |  |

1 The international dollar is a currency unit adjusted for purchasing power parity (PPP) that is used to compare the value of products and services in different countries.
2 Taxes: taxes imposed on goods or services which cause consumers to pay higher prices.
3 Excise taxes: these have a greater impact on public health since they are applied exclusively to tobacco products and raise their relative price compared to other products and services.
4 Specific tax: it is established in relation to quantity, for example, a set quantity of cigarettes, or by weight.
5 Ad valorem tax: it is based on the value of the product, such as a percentage of the retail price, the manufacturer's price, etc.
6 The effectiveness of import duties in raising sales prices has been declining as countries have signed bilateral, regional, and global trade agreements.
7 Specific excise taxes tend to raise consumer prices more, relatively, than ad valorem taxes. Imposing the same specific excise tax on all cigarettes sends the clear message that they are all equally detrimental.
8 If the tax calculated falls below a specified minimum level, a specific tax rate is applied.

## EVOLUTION OF TAXES AND PRICES ON THE MOST POPULAR BRAND OF CIGARETTES

|  | 2008 | 2010 | 2012 | 2014 | 2016 | 2018 | 2020 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Tax (percentage of the final price of the most sold brand) | 57.17\% | 59.19\% | 37.11\% | 37.11\% | 37.11\% | 43.61\% | 34.75\% |
| Price of the most sold brand (international dollars PPP) | 4.29 | 4.43 | 4.04 | 3.81 | 3.73 | 2.99 | 4.20 |

EVOLUTION OF THE PRICE OF CIGARETTES COMPARED TO INCOME

|  | 2010 | 2012 | 2014 |  | 2016 |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |

* Note that a higher percentage implies a lower affordability and a greater disincentive to consume cigarettes

9 Affordability is considered unchanged (2010-2020) if the least-squares growth rate is not statistically significant at the $5 \%$ level.

## SUPPLEMENTARY INFORMATION ON TAXES

## $1 *$

## Tobacco: prices and taxes

## RETAIL PRICE PER PACK OF 20 CIGARETTES

|  |  | In local currency (CAD) | In international dollars (PPP) ${ }^{\mathbf{1}}$ |
| :--- | :--- | :---: | :---: |
| Most popular brand: | --- | 12.85 | 10.78 |
| Most inexpensive brand: | LD Red KS | 9.59 | 8.04 |
| Most expensive brand: | Canadian Classics Original KS | 14.88 | 12.48 |

## TAXES ON TOBACCO ${ }^{2}$

Taxes as percentage of the final price of the most sold brand

| Excise taxes $^{3}$ | Specific taxes $^{4}$ | $52.81 \%$ |
| :--- | :--- | ---: |
| Value-added/sales tax (VAT) | ${\text { Ad valorem } \text { tax }^{5}}$ ( | $0.00 \%$ |
| Import duty |  |  |
| Other taxes |  | $8.90 \%$ |
| Total excise taxes |  | $0.00 \%$ |

1 The international dollar is a currency unit adjusted for purchasing power parity (PPP) that is used to compare the value of products and services in different countries.
2 Taxes: taxes imposed on goods or services which cause consumers to pay higher prices.
3 Excise taxes: these have a greater impact on public health since they are applied exclusively to tobacco products and raise their relative price compared to other products and services.
4 Specific tax: it is established in relation to quantity, for example, a set quantity of cigarettes, or by weight.
5 Ad valorem tax: it is based on the value of the product, such as a percentage of the retail price, the manufacturer's price, etc.
6 The effectiveness of import duties in raising sales prices has been declining as countries have signed bilateral, regional, and global trade agreements.
7 Specific excise taxes tend to raise consumer prices more, relatively, than ad valorem taxes. Imposing the same specific excise tax on all cigarettes sends the clear message that they are all equally detrimental.
8 If the tax calculated falls below a specified minimum level, a specific tax rate is applied.

## EVOLUTION OF TAXES AND PRICES ON THE MOST POPULAR BRAND OF CIGARETTES

|  | 2008 | 2010 | 2012 | 2014 | 2016 | 2018 | $2020{ }^{9}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Tax (percentage of the final price of the most sold brand) | 64.55\% | 62.22\% | 64.45\% | 69.80\% | 66.21\% | 64.35\% | 61.71\% |
| Price of the most sold brand (international dollars PPP) | 6.32 | 7.08 | 6.82 | 7.52 | 8.52 | 9.86 | 10.78 |

9 The country has increased excise taxes on tobacco since 2018; however, due to price variability, the effect is not necessarily seen in the tax indicator
Note: Subnational rates and national excise taxation rates have been used by WHO to reflect an average Canadian taxation rate. Consequently, the reported taxation rates will be different to the posted tax rates. The price is a sales-weighted average of the price in Canada for the most sold brand.

EVOLUTION OF THE PRICE OF CIGARETTES COMPARED TO INCOME

|  | 2010 | 2012 | 2014 | 2016 | 2018 | 2020 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Percentage of per capita GDP required to purchase 100 packs of 20 cigarettes of the most sold brand* | 1.77\% | 1.61\% | 1.64\% | 1.83\% | 1.96\% | 2.27\% |
| Have cigarettes become less affordable since 2010? |  |  |  |  |  |  |
| Did cigarettes become less affordable between 2018 and 2020? |  |  |  |  |  |  |

## Design and administration of cigarette taxes

Are taxes applied in a mixed fashion (ad valorem and specific)?

No
If a mixed tax system is used, is the tax burden of specific taxes greater than that of ad valorem taxes? ${ }^{7}$
If an ad valorem or mixed tax system exists, is a specific minimum tax applied? ${ }^{8}$

## Tobacco: prices and taxes

## RETAIL PRICE PER PACK OF 20 CIGARETTES

|  |  | In local currency (CRC) | In international dollars (PPP) ${ }^{1}$ |
| :--- | :--- | :---: | :---: |
| Most popular brand: | Derby | $2,200.00$ | 6.30 |
| Most inexpensive brand: | L\&M | $1,500.00$ | 4.29 |
| Most expensive brand: | Marlboro | $2,200.00$ | 6.30 |

## TAXES ON TOBACCO ${ }^{2}$

Taxes as percentage of the final price of the most sold brand

| Excise taxes ${ }^{3}$ | Specific taxes ${ }^{4}$ | 21.98\% |
| :---: | :---: | :---: |
|  | Ad valorem tax ${ }^{5}$ | 21.05\% |
| Value-added/sales tax (VAT) |  | 8.98\% |
| Import duty ${ }^{6}$ |  | 0.00\% |
| Other taxes |  | 1.61\% |
| Total excise taxes |  | 53.62\% |

1 The international dollar is a currency unit adjusted for purchasing power parity (PPP) that is used to compare the value of products and services in different countries.
2 Taxes: taxes imposed on goods or services which cause consumers to pay higher prices.
3 Excise taxes: these have a greater impact on public health since they are applied exclusively to tobacco products and raise their relative price compared to other products and services.
4 Specific tax: it is established in relation to quantity, for example, a set quantity of cigarettes, or by weight.
5 Ad valorem tax: it is based on the value of the product, such as a percentage of the retail price, the manufacturer's price, etc.
6 The effectiveness of import duties in raising sales prices has been declining as countries have signed bilateral, regional, and global trade agreements.
7 Specific excise taxes tend to raise consumer prices more, relatively, than ad valorem taxes. Imposing the same specific excise tax on all cigarettes sends the clear message that they are all equally detrimental.
8 If the tax calculated falls below a specified minimum level, a specific tax rate is applied.

## EVOLUTION OF TAXES AND PRICES ON THE MOST POPULAR BRAND OF CIGARETTES

|  | 2008 | 2010 | 2012 | 2014 | 2016 | 2018 | $2020{ }^{9}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Tax (percentage of the final price of the most sold brand) | 41.57\% | 41.57\% | 58.48\% | 56.64\% | 56.21\% | 55.11\% | 53.62\% |
| Price of the most sold brand (international dollars PPP) | 2.56 | 2.38 | 3.67 | 4.40 | 4.82 | 5.41 | 6.30 |

9 The country has increased excise taxes on tobacco since 2018; however, due to price variability, the effect is not necessarily seen in the tax indicator.

## EVOLUTION OF THE PRICE OF CIGARETTES COMPARED TO INCOME

|  | 2010 | 2012 | 2014 | 2016 | 2018 | 2020 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Percentage of per capita GDP required to purchase 100 packs of 20 cigarettes of the most sold brand* | 1.86\% | 2.60\% | 2.82\% | 2.68\% | 2.73\% | 3.26\% |
| Have cigarettes become less affordable since 2010? |  |  |  |  |  |  |
| Did cigarettes become less affordable between 2018 and 2020? |  |  |  |  |  |  |

[^1] most sold brand ${ }^{*}$

## SUPPLEMENTARY INFORMATION ON TAXES

Are sales of duty (or excise) free cigarettes banned?
Are tobacco tax revenues (or part of) earmarked for health purposes?

## No

All revenues from the specific excise tax (CRC 483.6 per pack) are used to fund programs for the prevention and treatment of diseases related to tobacco use, cancer treatment, harmful use of alcohol, and sports.

## Tobacco: prices and taxes

## RETAIL PRICE PER PACK OF 20 CIGARETTES

|  |  | In local currency (XCD) | In international dollars (PPP) ${ }^{\mathbf{1}}$ |
| :--- | :--- | :---: | :---: |
| Most popular brand: | Hillsborough | 5.00 | 2.90 |
| Most inexpensive brand: | Hillsborough | 5.00 | 2.90 |
| Most expensive brand: | Dunhill | 5.78 | 3.35 |

## TAXES ON TOBACCO ${ }^{2}$

Taxes as percentage of the final price of the most sold brand

| Excise taxes $^{3}$ | Specific taxes $^{4}$ | $9.68 \%$ |
| :--- | :--- | ---: |
| Value-added/sales tax (VAT) | Ad valorem tax $^{5}$ | $0.00 \%$ |
| Import duty |  |  |
| Other taxes |  | $13.04 \%$ |
| Total excise taxes |  | $0.00 \%$ |

## Design and administration of cigarette taxes

Are taxes applied in a mixed fashion (ad valorem No and specific)?
If a mixed tax system is used, is the tax burden of specific taxes greater than that of ad valorem taxes? ${ }^{7}$
If an ad valorem or mixed tax system exists, is a specific minimum tax applied? ${ }^{8}$

1 The international dollar is a currency unit adjusted for purchasing power parity (PPP) that is used to compare the value of products and services in different countries.
2 Taxes: taxes imposed on goods or services which cause consumers to pay higher prices.
3 Excise taxes: these have a greater impact on public health since they are applied exclusively to tobacco products and raise their relative price compared to other products and services.
4 Specific tax: it is established in relation to quantity, for example, a set quantity of cigarettes, or by weight.
5 Ad valorem tax: it is based on the value of the product, such as a percentage of the retail price, the manufacturer's price, etc.
6 The effectiveness of import duties in raising sales prices has been declining as countries have signed bilateral, regional, and global trade agreements.
7 Specific excise taxes tend to raise consumer prices more, relatively, than ad valorem taxes. Imposing the same specific excise tax on all cigarettes sends the clear message that they are all equally detrimental.
8 If the tax calculated falls below a specified minimum level, a specific tax rate is applied.

## EVOLUTION OF TAXES AND PRICES ON THE MOST POPULAR BRAND OF CIGARETTES

|  | 2008 | 2010 | 2012 | 2014 | 2016 | 2018 | 2020 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Tax (percentage of the final price of the most sold brand) | 25.61\% | 25.61\% | 23.40\% | 23.40\% | 24.30\% | 23.57\% | 22.72\% |
| Price of the most sold brand (international dollars PPP) | 1.98 | 1.86 | 2.29 | 2.35 | 2.35 | 2.67 | 2.90 |

## EVOLUTION OF THE PRICE OF CIGARETTES COMPARED TO INCOME

|  | 2010 | 2012 | 2014 | 2016 | 2018 | 2020 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Percentage of per capita GDP required to purchase 100 packs of 20 cigarettes of the most sold brand* | 1.86\% | 2.29\% | 2.13\% | 1.96\% | 2.26\% | 2.40\% |

Have cigarettes become less affordable since 2010?
Did cigarettes become less affordable between 2018 and 2020?
No change ${ }^{9}$
aid cigarter
9 Affordability is considered unchanged (2010-2020) if the least-squares growth rate is not statistically significant at the $5 \%$ level.

| Date of the ratification or accession $(\mathrm{d} / \mathrm{m} / \mathrm{y}):$ | - | - |

## Tobacco: prices and taxes

## retail price per pack of 20 Cigarettes

|  |  | In local currency (DOP) | In international dollars (PPP) ${ }^{\mathbf{1}}$ |
| :--- | :--- | :---: | :---: |
| Most popular brand: | Nacional | 300.00 | 13.30 |
| Most inexpensive brand: | L\&M | 250.00 | 11.08 |
| Most expensive brand: | Marlboro | 330.00 | 14.63 |

## TAXES ON TOBACCO ${ }^{2}$

Taxes as percentage of the final price of the most sold brand

| Excise taxes $^{3}$ | Specific taxes $^{4}$ | $17.87 \%$ |
| :--- | :--- | :---: |
| Value-added/sales tax (VAT) | ${\text { Ad valorem } \text { tax }^{5}}$ (1.15\% |  |
| Import duty |  | $15.25 \%$ |
| Other taxes |  | $0.00 \%$ |
| Total excise taxes |  | $0.00 \%$ |

1 The international dollar is a currency unit adjusted for purchasing power parity (PPP) that is used to compare the value of products and services in different countries.
2 Taxes: taxes imposed on goods or services which cause consumers to pay higher prices.
3 Excise taxes: these have a greater impact on public health since they are applied exclusively to tobacco products and raise their relative price compared to other products and services.
4 Specific tax: it is established in relation to quantity, for example, a set quantity of cigarettes, or by weight.
5 Ad valorem tax: it is based on the value of the product, such as a percentage of the retail price, the manufacturer's price, etc.
6 The effectiveness of import duties in raising sales prices has been declining as countries have signed bilateral, regional, and global trade agreements.
7 Specific excise taxes tend to raise consumer prices more, relatively, than ad valorem taxes. Imposing the same specific excise tax on all cigarettes sends the clear message that they are all equally detrimental.
8 If the tax calculated falls below a specified minimum level, a specific tax rate is applied.

## EVOLUTION OF TAXES AND PRICES ON THE MOST POPULAR BRAND OF CIGARETTES

|  | 2008 | 2010 | 2012 | 2014 | 2016 | 2018 | $2020^{9}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Tax (percentage of the final price of the most sold brand) | 57.03\% | 57.11\% | 58.59\% | 58.87\% | 57.21\% | 51.11\% | 44.27\% |
| Price of the most sold brand (international dollars PPP) | 5.97 | 6.69 | 6.44 | 7.02 | 7.20 | 9.10 | 13.30 |

9 The country has increased excise taxes on tobacco since 2018; however, due to price variability, the effect is not necessarily seen in the tax indicator.

EVOLUTION OF THE PRICE OF CIGARETTES COMPARED TO INCOME

|  | 2010 | 2012 | 2014 | 2016 | 2018 | 2020 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Percentage of per capita GDP required to purchase 100 packs of 20 cigarettes of the most sold brand* | 5.74\% | 5.27\% | 5.07\% | 4.33\% | 4.85\% | 7.08\% |
| Have cigarettes become less affordable since 2010? |  |  |  | No change ${ }^{10}$ |  |  |
| Did cigarettes become less affordable between 2018 and 2020? |  |  |  | Yes |  |  |
| * Note that a higher percentage implies a lower affordability and a greater disincentive to consume cigarettes 10 Affordability is considered unchanged (2010-2020) if the least-squares growth rate is not statistically signifi |  |  |  |  |  |  |

## Tobacco: prices and taxes

## RETAIL PRICE PER PACK OF 20 CIGARETTES

|  |  | In local currency (GTQ) | In international dollars (PPP) ${ }^{\mathbf{1}}$ |
| :--- | :--- | :---: | :---: |
| Most popular brand: | Rubios | 20.50 | 5.17 |
| Most inexpensive brand: | Payaso | 15.50 | 3.91 |
| Most expensive brand: | Marlboro | 23.49 | 5.92 |

## TAXES ON TOBACCO ${ }^{2}$

| Taxes as percentage of the final price of the most sold brand |  |  | Design and administration of cigarette taxes |  |
| :---: | :---: | :---: | :---: | :---: |
| Excise taxes ${ }^{3}$ | Specific taxes ${ }^{4}$ | 0.00\% | Are taxes applied in a mixed fashion (ad valorem and specific)? | No |
|  | Ad valorem tax ${ }^{5}$ | 38.27\% |  |  |
| Value-added/sales tax (VAT) |  | 10.71\% | If a mixed tax system is used, is the tax burden of specific taxes greater than that of ad valorem taxes? ${ }^{7}$ | --- |
| Import duty ${ }^{6}$ |  | 0.00\% |  |  |
| Other taxes |  | 0.00\% | If an ad valorem or mixed tax system exists, is a specific minimum tax applied? ${ }^{8}$ | No |
| Total excise taxes |  | 48.98\% |  |  |
| 1 The international dollar is a currency unit adjusted for purchasing power parity (PPP) that is used to compare the value of products and services in different countries. <br> 2 Taxes: taxes imposed on goods or services which cause consumers to pay higher prices. <br> 3 Excise taxes: these have a greater impact on public health since they are applied exclusively to tobacco products and raise their relative price compared to other products and services. <br> 4 Specific tax: it is established in relation to quantity, for example, a set quantity of cigarettes, or by weight. <br> 5 Ad valorem tax: it is based on the value of the product, such as a percentage of the retail price, the manufacturer's price, etc. <br> 6 The effectiveness of import duties in raising sales prices has been declining as countries have signed bilateral, regional, and global trade agreements. <br> 7 Specific excise taxes tend to raise consumer prices more, relatively, than ad valorem taxes. Imposing the same specific excise tax on all cigarettes sends the clear message that they are all equally detrimental. <br> 8 If the tax calculated falls below a specified minimum level, a specific tax rate is applied. |  |  |  |  |

## EVOLUTION OF TAXES AND PRICES ON THE MOST POPULAR BRAND OF CIGARETTES

|  | 2008 | 2010 | 2012 | 2014 | 2016 | 2018 | 2020 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Tax (percentage of the final price of the most sold brand) | 51.79\% | 51.79\% | 48.98\% | 48.98\% | 48.98\% | 48.98\% | 48.98\% |
| Price of the most sold brand (international dollars PPP) | 2.97 | 3.87 | 3.84 | 4.78 | 4.92 | 5.14 | 5.17 |

EVOLUTION OF THE PRICE OF CIGARETTES COMPARED TO INCOME

|  | 2010 | 2012 | 2014 | 2016 | 2018 | 2020 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Percentage of per capita GDP required to purchase 100 packs of 20 cigarettes of the most sold brand* | 5.95\% | 5.47\% | 6.41\% | 6.28\% | 6.28\% | 6.25\% |
| Have cigarettes become less affordable since 2010? |  |  |  | No change ${ }^{9}$ |  |  |
| Did cigarettes become less affordable between 2018 and 2020? |  |  |  | No ${ }^{10}$ |  |  |

* Note that a higher percentage implies a lower affordability and a greater disincentive to consume cigarettes

9 Affordability is considered unchanged (2010-2020) if the least-squares growth rate is not statistically significant at the $5 \%$ level.
10 Cigarettes became more expensive between 2018 and 2020, but became more affordable between 2018 and 2020.

 most sold brand*

## SUPPLEMENTARY INFORMATION ON TAXES

Are sales of duty (or excise) free cigarettes banned? No

Are tobacco tax revenues (or part of) earmarked for health purposes?

All revenues from the excise tax on tobacco are used for health programs.

## Tobacco: prices and taxes

## RETAIL PRICE PER PACK OF 20 CIGARETTES

|  |  | In local currency (HNL) | In international dollars (PPP) $\mathbf{1}^{\mathbf{1}}$ |
| :--- | :--- | :---: | :---: |
| Most popular brand: | Belmont | 55.00 | 5.06 |
| Most inexpensive brand: | Modern | 25.00 | 2.30 |
| Most expensive brand: | Marlboro | 55.00 | 5.06 |

## TAXES ON TOBACCO ${ }^{2}$

Taxes as percentage of the final price of the most sold brand

| Excise taxes $^{3}$ | Specific taxes $^{4}$ | $17.89 \%$ |
| :--- | :--- | ---: |
| Value-added/sales tax (VAT) | ${\text { Ad valorem } \text { tax }^{5}}$ ( |  |
| Import duty |  | $0.00 \%$ |
| Other taxes |  | $15.25 \%$ |
| Total excise taxes |  | $9.49 \%$ |

Design and administration of cigarette taxes
Are taxes applied in a mixed fashion (ad valorem and specific)?
If a mixed tax system is used, is the tax burden of specific taxes greater than that of ad valorem taxes? ${ }^{7}$
If an ad valorem or mixed tax system exists, is a specific minimum tax applied? ${ }^{8}$

1 The international dollar is a currency unit adjusted for purchasing power parity (PPP) that is used to compare the value of products and services in different countries.
2 Taxes: taxes imposed on goods or services which cause consumers to pay higher prices.
3 Excise taxes: these have a greater impact on public health since they are applied exclusively to tobacco products and raise their relative price compared to other products and services.
4 Specific tax: it is established in relation to quantity, for example, a set quantity of cigarettes, or by weight.
5 Ad valorem tax: it is based on the value of the product, such as a percentage of the retail price, the manufacturer's price, etc.
6 The effectiveness of import duties in raising sales prices has been declining as countries have signed bilateral, regional, and global trade agreements.
7 Specific excise taxes tend to raise consumer prices more, relatively, than ad valorem taxes. Imposing the same specific excise tax on all cigarettes sends the clear message that they are all equally detrimental.
8 If the tax calculated falls below a specified minimum level, a specific tax rate is applied.

## EVOLUTION OF TAXES AND PRICES ON THE MOST POPULAR BRAND OF CIGARETTES

|  | 2008 | 2010 | 2012 | 2014 | 2016 | 2018 | $2020^{9}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Tax (percentage of the final price of the most sold brand) | 45.25\% | 38.97\% | 34.03\% | 36.76\% | 34.31\% | 41.86\% | 42.64\% |
| Price of the most sold brand (international dollars PPP) | 2.09 | 2.84 | 3.22 | 3.46 | 4.23 | 4.85 | 5.06 |

9 The country has increased excise taxes on tobacco since 2018; however, due to price variability, the effect is not necessarily seen in the tax indicator.

EVOLUTION OF THE PRICE OF CIGARETTES COMPARED TO INCOME

|  | 2010 | 2012 | 2014 | 2016 | 2018 | 2020 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Percentage of per capita GDP required to purchase 100 packs of 20 cigarettes of the most sold brand* | 7.50\% | 7.97\% | 7.78\% | 8.23\% | 8.38\% | 9.13\% |
| Have cigarettes become less affordable since 2010? |  |  |  | Yes |  |  |
| Did cigarettes become less affordable between 2018 and 2020? |  |  |  | Yes |  |  |
| * Note that a higher percentage implies a lower affordability and a greater disincentive to consume cigarettes |  |  |  |  |  |  |

-0- Percentage of GDP per capita required to purchase 100 packs of 20 cigarettes of the most sold brand ${ }^{*}$

## Tobacco: prices and taxes

## retail price per pack of 20 CIGARETTES

1 The international dollar is a currency unit adjusted for purchasing power parity (PPP) that is used to compare the value of products and services in different countries.
2 Taxes: taxes imposed on goods or services which cause consumers to pay higher prices.
3 Excise taxes: these have a greater impact on public health since they are applied exclusively to tobacco products and raise their relative price compared to other products and services.
4 Specific tax: it is established in relation to quantity, for example, a set quantity of cigarettes, or by weight.
5 Ad valorem tax: it is based on the value of the product, such as a percentage of the retail price, the manufacturer's price, etc.
6 The effectiveness of import duties in raising sales prices has been declining as countries have signed bilateral, regional, and global trade agreements.
7 Specific excise taxes tend to raise consumer prices more, relatively, than ad valorem taxes. Imposing the same specific excise tax on all cigarettes sends the clear message that they are all equally detrimental.
8 If the tax calculated falls below a specified minimum level, a specific tax rate is applied.

EVOLUTION OF TAXES AND PRICES ON THE MOST POPULAR BRAND OF CIGARETTES

|  | 2008 | 2010 | 2012 | 2014 | 2016 | 2018 | $2020^{9}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Tax (percentage of the final price of the most sold brand) | 19.79\% | 29.14\% | 29.11\% | 32.27\% | 35.09\% | 40.18\% | 69.37\% |
| Price of the most sold brand (international dollars PPP) | 2.87 | 3.46 | 2.99 | 3.84 | 4.72 | 4.12 | 10.59 |

9 The country has increased excise taxes on tobacco since 2018; however, due to price variability, the effect is not necessarily seen in the tax indicator.
Note: Prices and taxes are collected and calculated as of February 2021.

EVOLUTION OF THE PRICE OF CIGARETTES COMPARED TO INCOME

## SUPPLEMENTARY INFORMATION ON TAXES

Are sales of duty (or excise) free cigarettes banned?
Are tobacco tax revenues (or part of) earmarked for
health purposes?

| Percentage of per capita GDP required to purchase 100 packs of 20 cigarettes of the most sold brand* | 3.15\% | 3.08\% | 3.33\% | 5.04\% | 6.95\% | 5.96\% |
| Have cigarettes become less affordable since 2010? |  |  |  |  |  |  |
| Did cigarettes become less affordable between 2018 and 2020? |  |  |  | No ${ }^{10}$ |  |  |

*- Percentage of GDP per capita required to purchase 100 packs of 20 cigarettes of the most sold brand*

* Note that a higher percentage implies a lower affordability and a greater disincentive to consume cigarettes.

10 Cigarettes became more expensive between 2018 and 2020, but became more affordable between 2018 and 2020.

## SUPPLEMENTARY INFORMATION ON TAXES

Are sales of duty (or excise) free cigarettes banned?

## TAXES ON TOBACCO ${ }^{2}$

Taxes as percentage of the final price of the most sold brand

| Excise taxes $^{3}$ | Specific taxes $^{4}$ | $\ldots$ |
| :--- | :--- | :--- |
| Value-added/sales tax (VAT) | Ad valorem tax $^{5}$ | $\ldots$ |
| Import duty ${ }^{6}$ |  | $\ldots$ |
| Other taxes |  | $\ldots$ |
| Total excise taxes | $\ldots$ |  |

## Design and administration of cigarette taxes

Are taxes applied in a mixed fashion (ad valorem and specific)?
If a mixed tax system is used, is the tax burden of specific taxes greater than that of ad valorem taxes? ${ }^{7}$
If an ad valorem or mixed tax system exists, is a specific minimum tax applied? ${ }^{8}$

1 The international dollar is a currency unit adjusted for purchasing power parity (PPP) that is used to compare the value of products and services in different countries.
2 Taxes: taxes imposed on goods or services which cause consumers to pay higher prices.
3 Excise taxes: these have a greater impact on public health since they are applied exclusively to tobacco products and raise their relative price compared to other products and services.
4 Specific tax: it is established in relation to quantity, for example, a set quantity of cigarettes, or by weight.
5 Ad valorem tax: it is based on the value of the product, such as a percentage of the retail price, the manufacturer's price, etc.
6 The effectiveness of import duties in raising sales prices has been declining as countries have signed bilateral, regional, and global trade agreements.
7 Specific excise taxes tend to raise consumer prices more, relatively, than ad valorem taxes. Imposing the same specific excise tax on all cigarettes sends the clear message that they are all equally detrimental.
8 If the tax calculated falls below a specified minimum level, a specific tax rate is applied.

| Value-added/sales tax (VAT) |  | $13.79 \%$ |
| Import duty |  |  |
| Other taxes | $0.00 \%$ |  |
| Total excise taxes | $2.44 \%$ |  |

## Design and administration of cigarette taxes <br> Are taxes applied in a mixed fashion (ad valorem

 and specific)?If a mixed tax system is used, is the tax burden of specific taxes greater than that of ad valorem taxes? ${ }^{7}$
If an ad valorem or mixed tax system exists, is a specific minimum tax applied? ${ }^{8}$

1 The international dollar is a currency unit adjusted for purchasing power parity (PPP) that is used to compare the value of products and services in different countries.
2 Taxes: taxes imposed on goods or services which cause consumers to pay higher prices.
3 Excise taxes: these have a greater impact on public health since they are applied exclusively to tobacco products and raise their relative price compared to other products and services.
4 Specific tax: it is established in relation to quantity, for example, a set quantity of cigarettes, or by weight.
5 Ad valorem tax: it is based on the value of the product, such as a percentage of the retail price, the manufacturer's price, etc.
6 The effectiveness of import duties in raising sales prices has been declining as countries have signed bilateral, regional, and global trade agreements.
7 Specific excise taxes tend to raise consumer prices more, relatively, than ad valorem taxes. Imposing the same specific excise tax on all cigarettes sends the clear message that they are all equally detrimental.
8 If the tax calculated falls below a specified minimum level, a specific tax rate is applied.

EVOLUTION OF TAXES AND PRICES ON THE MOST POPULAR BRAND OF CIGARETTES

|  | 2008 | $\mathbf{2 0 1 0}$ | $\mathbf{2 0 1 2}$ | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 6}$ | $\mathbf{2 0 1 8}$ | $\mathbf{2 0 2 0 ^ { 9 }}$ |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Tax (percentage of the <br> final price of the most <br> sold brand) | $14.71 \%$ | $14.71 \%$ | $\mathbf{1 7 . 4 0 \%}$ | $\mathbf{1 6 . 1 4 \%}$ | $20.69 \%$ | $16.89 \%$ | $23.11 \%$ |
| Price of the most sold | 3.27 | 3.22 | 3.33 | 3.76 | 3.91 | 6.42 | 5.17 |
| brand (international <br> dollars PPP) |  |  |  |  |  |  |  |

9 The country has increased excise taxes on tobacco since 2018; however, due to price variability, the effect is not necessarily seen in the tax indicator.

EVOLUTION OF THE PRICE OF CIGARETTES COMPARED TO INCOME

|  | 2010 | 2012 | 2014 | 2016 | 2018 | 2020 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Percentage of per capita GDP required to purchase 100 packs of 20 cigarettes of the most sold brand* | 3.21\% | 3.22\% | 3.36\% | 3.16\% | 5.04\% | 4.21\% |
| Have cigarettes become less affordable since 2010? |  |  |  | Yes |  |  |
| Did cigarettes become less affordable between 2018 and 2020? |  |  |  | $\mathrm{No}{ }^{10}$ |  |  |

10 Cigarettes became more expensive between 2018 and 2020, but became more affordable between 2018 and 2020.

## Tobacco: prices and taxes

## RETAIL PRICE PER PACK OF 20 CIGARETTES

|  |  | In local currency (SRD) | In international dollars (PPP) ${ }^{1}$ |
| :--- | :--- | :---: | :---: |
| Most popular brand: | Morello | 10.10 |  |
| Most inexpensive brand: | Pall Mall | 45.00 | 9.54 |
| Most expensive brand: | Dunhill | 42.50 | 11.22 |

## TAXES ON TOBACCO ${ }^{2}$

Taxes as percentage of the final price of the most sold brand

| Excise taxes $^{3}$ | Specific taxes $^{4}$ | $21.88 \%$ |
| :--- | :--- | ---: |
| Value-added/sales tax (VAT) | ${\text { Ad valorem } \text { tax }^{5}}$ ( |  |
| Import duty |  |  |
| Other taxes |  | $4.65 \%$ |
| Total excise taxes |  | $0.00 \%$ |

Design and administration of cigarette taxes Are taxes applied in a mixed fashion (ad valorem and specific)?

No
If a mixed tax system is used, is the tax burden of specific taxes greater than that of ad valorem taxes? ${ }^{7}$
If an ad valorem or mixed tax system exists, is a specific minimum tax applied? ${ }^{8}$

1 The international dollar is a currency unit adjusted for purchasing power parity (PPP) that is used to compare the value of products and services in different countries.
2 Taxes: taxes imposed on goods or services which cause consumers to pay higher prices.
3 Excise taxes: these have a greater impact on public health since they are applied exclusively to tobacco products and raise their relative price compared to other products and services.
4 Specific tax: it is established in relation to quantity, for example, a set quantity of cigarettes, or by weight.
5 Ad valorem tax: it is based on the value of the product, such as a percentage of the retail price, the manufacturer's price, etc.
6 The effectiveness of import duties in raising sales prices has been declining as countries have signed bilateral, regional, and global trade agreements.
7 Specific excise taxes tend to raise consumer prices more, relatively, than ad valorem taxes. Imposing the same specific excise tax on all cigarettes sends the clear message that they are all equally detrimental.
8 If the tax calculated falls below a specified minimum level, a specific tax rate is applied.

EVOLUTION OF TAXES AND PRICES ON THE MOST POPULAR BRAND OF CIGARETTES

|  | 2008 | 2010 | 2012 | 2014 | 2016 | 2018 | 2020 |

| Most expensive brand: | Marlboro | 165.00 | 5.91 |

## TAXES ON TOBACCO ${ }^{2}$

Taxes as percentage of the final price of the most sold brand

| Excise taxes $^{3}$ | Specific taxes $^{4}$ | $47.88 \%$ |
| :--- | :--- | ---: |
| Value-added/sales tax (VAT) | ${\text { Ad valorem } \text { tax }^{5}}$ ( | $0.00 \%$ |
| Import duty |  |  |
| Other taxes |  | $18.03 \%$ |
| Total excise taxes |  | $0.00 \%$ |

## Design and administration of cigarette taxes

Are taxes applied in a mixed fashion (ad valorem No
and specific)?

If a mixed tax system is used, is the tax burden of specific taxes greater than that of ad valorem taxes? ${ }^{7}$
If an ad valorem or mixed tax system exists, is a specific minimum tax applied? ${ }^{8}$

1 The international dollar is a currency unit adjusted for purchasing power parity (PPP) that is used to compare the value of products and services in different countries.
2 Taxes: taxes imposed on goods or services which cause consumers to pay higher prices.
3 Excise taxes: these have a greater impact on public health since they are applied exclusively to tobacco products and raise their relative price compared to other products and services.
4 Specific tax: it is established in relation to quantity, for example, a set quantity of cigarettes, or by weight.
5 Ad valorem tax: it is based on the value of the product, such as a percentage of the retail price, the manufacturer's price, etc.
6 The effectiveness of import duties in raising sales prices has been declining as countries have signed bilateral, regional, and global trade agreements.
7 Specific excise taxes tend to raise consumer prices more, relatively, than ad valorem taxes. Imposing the same specific excise tax on all cigarettes sends the clear message that they are all equally detrimental.
8 If the tax calculated falls below a specified minimum level, a specific tax rate is applied.

## EVOLUTION OF TAXES AND PRICES ON THE MOST POPULAR BRAND OF CIGARETTES

|  | 2008 | 2010 | 2012 | 2014 | 2016 | 2018 | $2020{ }^{9}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Tax (percentage of the final price of the most sold brand) | 65.82\% | 72.32\% | 68.70\% | 66.75\% | 65.51\% | 66.08\% | 65.92\% |
| Price of the most sold brand (international dollars PPP) | 3.49 | 4.89 | 4.43 | 4.01 | 4.90 | 5.83 | 5.91 |

9 The country has increased excise taxes on tobacco since 2018; however, due to price variability, the effect is not necessarily seen in the tax indicator.

## EVOLUTION OF THE PRICE OF CIGARETTES COMPARED TO INCOME

|  | 2010 | 2012 | 2014 | 2016 | 2018 | 2020 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Percentage of per capita GDP required to purchase 100 packs of 20 cigarettes of the most sold brand* | 2.94\% | 2.47\% | 2.02\% | 2.41\% | 2.68\% | 2.77\% |
| Have cigarettes become less affordable since 2010? |  |  |  | No change ${ }^{10}$ |  |  |
| Did cigarettes become less affordable between 2018 and 2020? |  |  |  | Yes |  |  |

$=-$ Percentage of GDP per capita required to purchase 100 packs of 20 cigarettes of the
most sold brand

Did cigarettes become less affordable between 2018 and 2020?
Yes

* Note that a higher percentage implies a lower affordability and a greater disincentive to consume cigarettes

10 Affordability is considered unchanged (2010-2020) if the least-squares growth rate is not statistically significant at the $5 \%$ level.

## SUPPLEMENTARY INFORMATION ON TAXES

Are sales of duty (or excise) free cigarettes banned?
Are tobacco tax revenues (or part of) earmarked for health purposes?
... Data not reported/not available
--- Data not required/not applicable

|  | Ad valorem tax ${ }^{5}$ | 66.79\% |
| Value-added/sales tax (VAT) |  | 4.58\% |
| Import duty ${ }^{6}$ |  | 0.00\% |
| Other taxes |  | 2.00\% |
| Total excise taxes |  | 73.37\% |

Design and administration of cigarette taxes Are taxes applied in a mixed fashion (ad valorem and specific)?

No
If a mixed tax system is used, is the tax burden of specific taxes greater than that of ad valorem taxes?? If an ad valorem or mixed tax system exists, is a specific minimum tax applied? ${ }^{8}$

1 The international dollar is a currency unit adjusted for purchasing power parity (PPP) that is used to compare the value of products and services in different countries.
2 Taxes: taxes imposed on goods or services which cause consumers to pay higher prices.
3 Excise taxes: these have a greater impact on public health since they are applied exclusively to tobacco products and raise their relative price compared to other products and services.
4 Specific tax: it is established in relation to quantity, for example, a set quantity of cigarettes, or by weight.
5 Ad valorem tax: it is based on the value of the product, such as a percentage of the retail price, the manufacturer's price, etc.
6 The effectiveness of import duties in raising sales prices has been declining as countries have signed bilateral, regional, and global trade agreements.
7 Specific excise taxes tend to raise consumer prices more, relatively, than ad valorem taxes. Imposing the same specific excise tax on all cigarettes sends the clear message that they are all equally detrimental. 8 If the tax calculated falls below a specified minimum level, a specific tax rate is applied.

Are sales of duty (or excise) free cigarettes banned?
Yes
Are tobacco tax revenues (or part of) earmarked for health purposes?

[^7]--- Data not required/not applicable
Did cigarettes become less affordable between 2018 and 2020?

* Note that a higher percentage implies a lower affordability and a greater disincentive to consume cigarettes
- Price of the most sold brand $\quad=-\operatorname{Tax}$ (percentage of the final (international dollars PPP) price of the most sold brand)

These country profiles present the progress by country of the implementation of the MPOWER technical package during the period 2018-2021 and form a supplement to the Report on Tobacco Control for the Region of the Americas 2022. The country profile focuses on the status of implementation of the MPOWER package in each of the 35 Member States. The data are presented in two summary sheets: MPOWER Summary sheet showing the most significant progress made with the six MPOWER measures, as well as classification of the country in each category; and the evolution of prices, taxes, and tax structure of the country. Collectively, 26 of the 35 Member States within the Region are implementing at least one measure of the MPOWER technical package at the highest level of application, accounting for $96 \%$ of the Region's population being protected from the harms of tobacco.
